Key

- SE** Service operated by Southeastern
- a** Arrival time
- d** Departure time
- s** Stops to set down passengers only
- MO** Mondays only
- MTX** Not Mondays and Tuesdays
- MX** Not Mondays
- TO** Tuesdays only
- TX** Not Tuesdays
- 0502** Direct train (shown in bold type)
- 0503** Connecting train (shown in light type)
-  Southeastern high speed train
-  Bus service
-  Continued in later column
-  Continued from earlier column
- DLR** Docklands Light Railway
-  Eurostar Interchange
-  London Underground Interchange
-  Recommended minimum connecting time (shown next to the station name)
-  Bus service
- A** Also calls at Swanley 1459, Otford 1508, Borough Green & Wrotham 1516 and West Malling 1523
- B** Also calls at Swanley 1729, Otford 1738, Borough Green & Wrotham 1746 and West Malling 1753
- C** Also calls at Swanley 1829, Otford 1838, Borough Green & Wrotham 1847 and West Malling 1854
- D** Also calls at Swanley 2200, Otford 2209, Borough Green & Wrotham 2219 and West Malling 2226
- E** Also calls at Swanley 2259, Otford 2308, Borough Green & Wrotham 2316 and West Malling 2323
-  The number of coaches on this train
-  The length of this train changes during the journey. The number of coaches shown is the maximum and may be shorter at your station

1: London, Tonbridge and Ashford International to Canterbury West, Folkestone, Dover, Ramsgate and Margate

This table is valid from Saturday 21 December 2024 until Saturday 17 May 2025

Key

SE Service operated by Southeastern

a Arrival time

d Departure time

s Stops to set down passengers only

0502 Direct train (shown in bold type)

0503 Connecting train (shown in light type)

Southeastern high speed train

DLR Docklands Light Railway

Eurostar Interchange

London Underground Interchange

15 Recommended minimum connecting time (shown next to the station name)

The number of coaches on this train

The length of this train changes during the journey. The number of coaches shown is the maximum and may be shorter at your station

1: London, Tonbridge and Ashford International to Canterbury West, Folkestone, Dover, Ramsgate and Margate

This table is valid from Sunday 15 December 2024 until Sunday 11 May 2025

Sunday

Sunday 1 of 6

Key

SE Service operated by Southeastern

a Arrival time

d Departure time

FO Fridays only

FX Not Fridays

MT0 Mondays and Tuesdays only

MTX Not Mondays and Tuesdays

0502 Direct train (shown in bold type)

0503 Connecting train (shown in light type)

 Southeastern high speed train

 Continued in later column

 Continued from earlier column

DLR Docklands Light Railway

 Eurostar Interchange

 London Underground Interchange

4 Recommended minimum connecting time (shown next to the station name)

A From Faversham

 The number of coaches on this train

 The length of this train changes during the journey. The number of coaches shown is the maximum and may be shorter at your station

1: Margate, Ramsgate, Dover, Folkestone and Canterbury West to Ashford International, Tonbridge and London

This table is valid from Saturday 21 December 2024 until Saturday 17 May 2025

Key

SE Service operated by Southeastern

a Arrival time

d Departure time

0502 Direct train (shown in bold type)

0503 Connecting train (shown in light type)

Southeastern high speed train

DLR Docklands Light Railway

Eurostar Interchange

London Underground Interchange

4 Recommended minimum connecting time (shown next to the station name)

The number of coaches on this train

The length of this train changes during the journey. The number of coaches shown is the maximum and may be shorter at your station

This table is valid from Monday 16 December 2024 until Friday 16 May 2025

Key

- SN Service operated by Southern
- a Arrival time
- d Departure time
- 6 Denotes the minimum time in minutes that should be allowed to change trains. At stations with no number, please allow at least 5 minutes
- Interchange with London Underground
- Interchange with Tramlink
- Station within Airport terminal
- 1 First Class accommodation available
- Continued in later column
- Continued from earlier column
- A Also calls at Selhurst 0609
- B Change at Hampden Park for stations towards London
- C Change at Hampden Park for stations towards Brighton

U: Ashford, Hastings, Eastbourne, Seaford and Lewes to Brighton, Gatwick Airport, Croydon and London

This table is valid from Saturday 21 December 2024 until Saturday 17 May 2025

Key

- SN Service operated by Southern
- a Arrival time
- d Departure time
- 6 Denotes the minimum time in minutes that should be allowed to change trains. At stations with no number, please allow at least 5 minutes
- Interchange with London Underground
- Interchange with Tramlink
- Station within Airport terminal
- 1 First Class accommodation available
- A Change at Hampden Park for stations towards Brighton

This table is valid from Sunday 15 December 2024 until Sunday 11 May 2025

This Report has been prepared solely for use by the party which commissioned it (the 'Client') in connection with the captioned project. It should not be used for any other purpose. No person other than the Client or any party who has expressly agreed terms of reliance with us (the 'Recipient(s)') may rely on the content, information or any views expressed in the Report. This Report is confidential and contains proprietary intellectual property and we accept no duty of care, responsibility or liability to any other recipient of this Report. No representation, warranty or undertaking, express or implied, is made and no responsibility or liability is accepted by us to any party other than the Client or any Recipient(s), as to the accuracy or completeness of the information contained in this Report. For the avoidance of doubt this Report does not in any way purport to include any legal, insurance or financial advice or opinion.

We disclaim all and any liability whether arising in tort, contract or otherwise which we might otherwise have to any party other than the Client or the Recipient(s), in respect of this Report, or any information contained in it. We accept no responsibility for any error or omission in the Report which is due to an error or omission in data, information or statements supplied to us by other parties including the Client (the 'Data'). We have not independently verified the Data or otherwise examined it to determine the accuracy, completeness, sufficiency for any purpose or feasibility for any particular outcome including financial.

Forecasts presented in this document were prepared using the Data and the Report is dependent or based on the Data. Inevitably, some of the assumptions used to develop the forecasts will not be realised and unanticipated events and circumstances may occur. Consequently, we do not guarantee or warrant the conclusions contained in the Report as there are likely to be differences between the forecasts and the actual results and those differences may be material. While we consider that the information and opinions given in this Report are sound all parties must rely on their own skill and judgement when making use of it.

Information and opinions are current only as of the date of the Report and we accept no responsibility for updating such information or opinion. It should, therefore, not be assumed that any such information or opinion continues to be accurate subsequent to the date of the Report. Under no circumstances may this Report or any extract or summary thereof be used in connection with any public or private securities offering including any related memorandum or prospectus for any securities offering or stock exchange listing or announcement.

By acceptance of this Report you agree to be bound by this disclaimer. This disclaimer and any issues, disputes or claims arising out of or in connection with it (whether contractual or non-contractual in nature such as claims in tort, from breach of statute or regulation or otherwise) shall be governed by, and construed in accordance with, the laws of England and Wales to the exclusion of all conflict of laws principles and rules. All disputes or claims arising out of or relating to this disclaimer shall be subject to the exclusive jurisdiction of the English and Welsh courts to which the parties irrevocably submit.

1 Special Development Order Requirements

This document has been prepared to address Schedule 2 Part 3 Operation.

- e. Managing traffic associated with the operation of the development, including:
- i. the management of vehicles moving between the site and the strategic road network (being the highways for which now National Highways is the highway authority, by virtue of article 2 of the Appointment of a Strategic Highways Company Order 2015(b)), and the provision of signage for their drivers; and
 - ii. preventing vehicles carrying goods specified in paragraph A.4 of Part 1 from having access to, or being stationed on the site

The policy is:

- That the Heavy Goods Vehicles (HGVs) use the signed routes to the site from the Strategic Road Network (SRN)
- That the impact of staff travel will be minimised through the implementation of a Staff Travel Plan (STP)
- That the Site Contractor will exclude vehicles carrying goods specified in paragraph A.4 of Part 1 (see **Appendix C – Dangerous Goods Management Plan**)

The Management of Vehicles Moving Between the Inland Border Facility and the Strategic Road Network

Overview:

- In response to policy requirements a set of procedures have been developed to ensure that HGVs use the signed routes to the site from the SRN and to minimise the impact of staff travel on the surrounding road network. This includes the production of a **Site Signage Strategy (Appendix H)**, **Traffic Management Plan (Appendix I)**, **Monitoring Plan (Appendix J)** and **Staff Travel Plan (Appendix M)**
- External public highway signage has been agreed with all SRN and Local Road Network (LRN) highway authorities. Sign designs are in accordance with required public highway requirements as defined by the UK Government's Statutory Instrument 'Traffic Signs Regulations & General Directions 2016'. It has been agreed with all highway authorities that signage will commence on the SRN corridor on approach to the site (e.g. M20, A20). It has been agreed that messaging further upstream is required before M20 J9 in order to strengthen the message that HGVs should use M20 J10A to access the site. Signs have been added from Port of Dover and Eurotunnel station to guide incoming HGVs to the site. The sign design includes adoption of 'white on black' HGV plates using a maximum of 3 words 'Inland Border Facility'; supplemented by the use of 'black X on yellow background' applied on existing signs
- Staff employed on the site will be encouraged to travel to site through a variety of sustainable travel options to minimise reliance on use of private vehicles. These considerations are explored in this dedicated **Staff Travel Plan (Appendix M)**

Procedures:

- This Staff Travel Plan sets out how staff travel to and from the site will be managed and the measures to encourage travel by sustainable modes of transport
- In order to implement the STP an IBF Travel Plan Coordinator (TPC) as a part time role will be assigned. The TPC will be responsible for progressing the measures and being a contact point with regards to sustainable transport
- The STP includes the following measures:
 - Staff to be briefed on the sustainable travel options at their disposal
 - Free staff shuttle bus to Ashford Train Station and from the local park and ride site at the Cattle Market for both IBF and BCP staff
 - Provide staff with information on travelling safely within COVID-19 restrictions, if required
 - Undertake a baseline modal share survey
 - Undertake STP monitoring
 - Set up a car share scheme or promote the use of an existing car sharing website
 - Provide a guaranteed ride home for car sharers
 - Promote electric vehicle charging points
 - Provide each member of staff with a travel pack to encourage the use of sustainable transport
 - Provide on-site cycle parking
 - Provide staff with facilities to make necessary repairs to bicycles
 - Offer all staff personalised travel planning sessions

This STP has been developed to manage staff travel to and from the site, reduce the impact of staff travel on the local area and seek opportunities for promoting the use of sustainable travel modes.

Following this summary, the document is structured as per Table 1.1.

2 Introduction

This section establishes the purpose of this Staff Travel Plan (STP) for the Sevington Inland Border Facility (IBF) and outlines its contents.

Full official copies of this document must be treated as confidential. They are not for public distribution or display and copies will be stored in a secure location. If copied or distributed this would not be a controlled version and may be subject to changes.

Staff who have been issued with this plan must:

- Be familiar with the plan's contents
- Be aware of their role within the plan
- Participate in their required training and any plan exercises
- Actively support and participate in the actions and exercises required of them
- Ensure the plan's safe keeping
- Destroy or return the plan as instructed

All IBF communications will be handled at the tactical command level by the IBF Bronze, all Border Control Post (BCP) communications will be handled at the tactical command level by the BCP Bronze and only certain IBF and BCP respective department's press teams personnel will be allowed to make media announcements in relation to their individual sites. All other members of staff are forbidden to make statements to the media for or on behalf of the Contractor(s) or any tenant or other group associated with the site.

2.1 Staff Travel Plan Purpose

The purpose of this STP is to manage staff travel to and from the site, reduce the impact of staff travel on the local area and seek opportunities for promoting the use of sustainable travel modes. This will be achieved through:

- Outlining the baseline situation for staff travel to and from the site including currently available transport modes
- Identifying resulting issues and opportunities for achieving a higher sustainable mode share
- Developing an Action Plan to achieve this objective

The document also provides details of the site, including vehicular, public transport, and walking and cycling routes to the site, and outlines the policy background for developing this STP.

The traffic numbers used to assess the Article 4 submission have been used throughout this STP.

2.2 What is a Travel Plan?

Travel Plans are management strategies for integrating proposals for sustainable travel into the planning process. Their primary aim is to reduce single occupancy car journeys generated by encouraging a shift to more sustainable modes of transport, thus mitigating the negative impacts of trips generated by the site. It includes a package of measures which aim to improve access by all modes of travel therefore improving choices for everyone.

This STP has been developed for the Sevington IBF, herein called 'the site'. The site is located at Mersham, Ashford, TN25 6GE. The site is being used for a temporary Heavy Goods Vehicle (HGV) customs and border control facility by Her Majesty's Revenue and Customs (HMRC), Border Force, Department for Environment, Food and Rural Affairs (Defra) including the Port Health Authority (PHA) and the Animal and Plant Health Agency (APHA), Department for Transport (DfT), Border Force and Department for Business, Energy & Industrial Strategy (BEIS) sub-components of the site. The purpose of the site is to enable required checks to take place inland on traffic entering and exiting the United Kingdom (UK), serving selected trade ports as part of the transitional arrangements arising from the UK's departure from the European Union (EU). Planning permission was granted for the site to be in operation for five years from 1 January 2021, with a capacity for up to 1300 HGVs. For operations from 1 July 2021, the site capacity is 651 HGV bays due to recent physical adjustments on site as detailed in the **main Operational Management Plan (OMP)**.

Staff travel has been analysed through collecting data from a Staff Travel Survey. This information includes origin and destination, current mode of travel, as well as staff attitudes towards alternative modes of travel to the site. This information informs the targets and action plan measures outlined in this Travel Plan. Some staff will be recruited from the local area in line with the **Local Employment Strategy (Appendix L of the OMP)**, however the majority of staff which will need specialist skills are likely to be recruited from outside the local area.

2.3 Benefits of the Travel Plan

The main benefits which can be expected from implementing a STP are as follows:

- Being an environmentally responsible site
- A workplace that is easier to access by all forms of transport
- Reducing the impact of the site and being a better neighbour to the surrounding community
- Reducing CO₂ emissions
- Making a positive contribution to the physical and mental health of staff

2.4 Travel Plan Coordinator

In order to implement the STP, a Travel Plan Coordinator (TPC) as a part time role is assigned. The TPC is responsible for progressing the measures and being a contact point with regards to sustainable transport.

3 Site Details

This section provides details of the development site, site usage and access.

3.1 Site Location

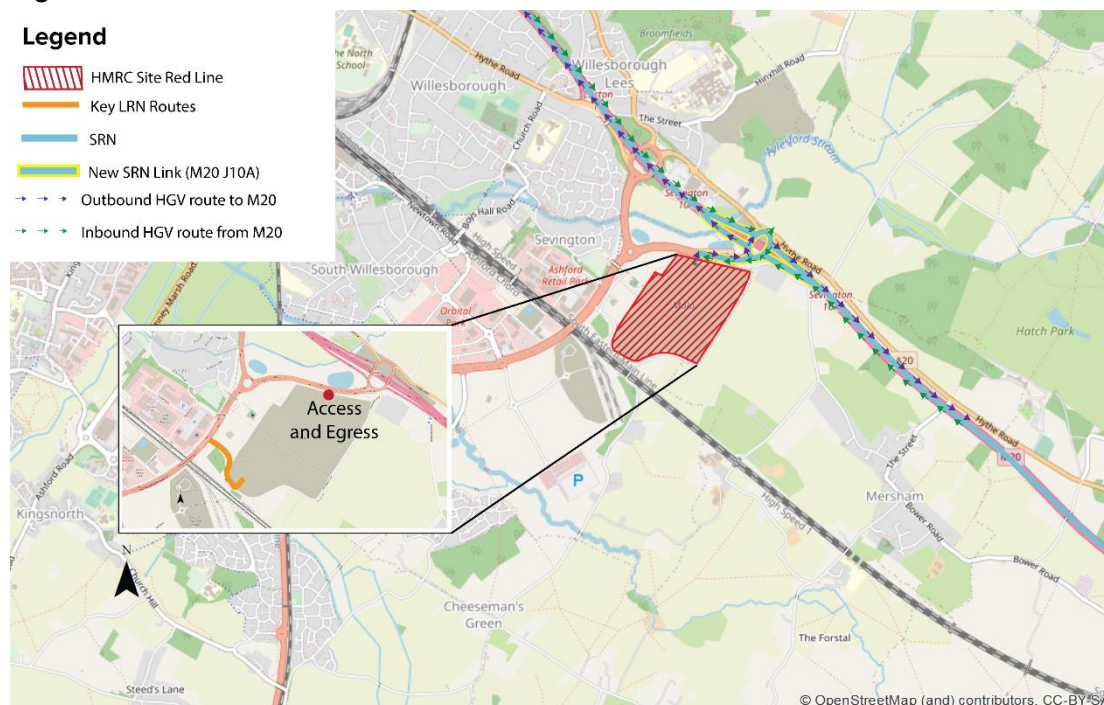

The Sevington Inland Border Facility (IBF) site is located to the south-east of Ashford in Kent which is approximately 50 miles south-east of London and 18 miles west of Dover.

The M20 motorway runs to the east of the site from Folkestone towards London. The new M20 junction 10a, completed in August 2020, is located approximately 0.3 miles to the east of the site. A new dual carriageway, the A2070 Link Road, is located to the north of the site and connects the existing section of the A2070 Bad Munstereifel Road to M20 junction 10a.

The site is also bounded by Church Road and the rail link for the Channel Tunnel to the south and by Highfield Lane to the east which has been closed to through traffic. Immediately to the west of the site is St Mary's Church which is a Grade I Listed building and the Milbourn Equine Centre. A Public Right of Way (PRoW) runs west to east across the site. Within the immediate surrounding area there are residential properties along Church Road and further east along Kingsford Street.

Figure 3.1 presents the site location, access / egress point and the key routes to the site using the Strategic Road Network (SRN) and Local Road Network (LRN). Access and egress for Heavy Goods Vehicles (HGV) is wholly via the SRN on the M20 and A2070 Link Road.

Figure 3.1: Site Location

Source: Mott MacDonald

3.2 Proposed Development

The proposed development is the Sevington IBF, a temporary HGV customs and border control checking and parking facility to be operated for a period of five years from January 2021.

Department for Transport (DfT) were the initial site operator at Day One of operation (1 January 2021) and handed over the site to Her Majesty's Revenue & Customs (HMRC) on 1 January 2022.

3.2.1 Proposed Use

The temporary use of land until 31 December 2025, operating 24 hours a day 7 days a week, for an Inland Border Facility for use in different phases by Department for Transport, HM Revenue & Customs/Border Force, Department for Environment, Food and Rural Affairs, Port Health Authority (PHA) and Animal and Plant Health Agency (APHA) Department for Business, Energy and Industrial Strategy for border readiness, CTC, ATA Carnet, SPS, CITES and other customs related checks, and market surveillance activities, and ancillary COVID - 19 testing (if required) and facilities.

The site is operated by the HMRC, with Department for Environment, Food and Rural Affairs (Defra), DfT, Department for Business, Energy and Industrial Strategy (BEIS) and Border Force all on site to enable required checks to take place inland on traffic 'inbound' and 'outbound' entering and exiting the United Kingdom (UK) respectively, serving selected trade ports as part of the transitional arrangements arising from the UK's departure from the European Union (EU).

Planning permission has been granted for the site to be in operation for five years, with a capacity of up to 1300 HGV parking spaces and 357 staff parking spaces.

The site is operating in two phases. The first phase commenced from the day the site became operational (Day One) on 1 January 2021 with a capacity of up to 1300 HGV spaces. The second phase will commence when this OMP comes into effect with a reduced capacity of 651 HGV spaces. Note, this Staff Travel Plan (STP) is applicable to the second phase of operation of the site.

HMRC are the site operators of Sevington IBF, with BEIS operating as its sub-department. HMRC have five inspection sheds (an increase of three from Day One operations) to accommodate the expected increase demand of HGVs on site for HMRC checks.

Defra are sub operators of the Sevington site. Defra were due to have managers from Port Health Authority (PHA) and the Animal and Plant Health Agency (APHA) on-site to oversee documentation checks with physical inspection process for HGVs commencing from July 2022, however a Ministerial decision announced that no checks were to be made in 2022. The Border Control Post (BCP) demise consists of inspection sheds for animals, plants and animal produce, together with offices and a triage centre for dealing with the drivers attending the BCP. A temporary facility at Inspection Shed C has been established to hold APHA Goods entering the UK from the EU for the Ukraine Response Project.

In addition, there will be presence by members of APHA and Royal Society for the Prevention of Cruelty to Animals (RSPCA) for the Ukraine Response Project.

The DfT operation at the site concluded on 10 May 2021. However, the onsite Management Hub shall remain in place as the DfT is expected to use the site as a holding area in the event of contingency traffic management plans/emergencies under the Civil Contingencies Act 2004.

Market surveillance activities take place on site. This involves the checking of imported goods for product safety compliance by market surveillance authorities ('MSAs') discharging legal

obligations and responsibilities associated with BEIS. MSAs operate on site, sharing the same premises including buildings, staff car park and HGV parking spaces.

HGV parking areas with clearly marked bays are provided including designated areas for hazardous loads and electric hook up points for refrigerated vehicles. Access to the parking areas for HGVs are managed through the use of 'entry lanes'.

3.2.1.1 Staff Parking

Staff have access to 357 on-site car parking spaces (with two electric vehicle charging points). Ashford's Local Plan 2030 states that for non-residential development Ashford Borough Council (ABC) has relied on the advice of Kent County Council (KCC) and have generally been appropriate for the borough, although local instances of residential areas being used as overflow car parks for nearby employment uses is a concern. Policy TRA3 (b) – Parking Standards for Non-Residential Development uses KCC's Supplementary Planning Guidance 4 as the minimum standard and notes that the council may require proposals to depart from the standards in exceptional cases. KCC's parking standards do not contain specific parking standards for this type of use. Many Sui Generis land uses, including Vehicle Servicing and Repair, Bus Depot and Open Commercial Use, require a maximum of one space per two staff.

KCC's parking standards do not contain specific parking standards for this type of use. However, as a general rule, one space should be provided per employee. Similarly, to staff car parking, KCC's parking standards do not contain specific cycle parking standards for this type of use. For other Sui Generis uses, cycle parking can be provided on individual merit. The site provides cycle storage facilities for 60 bicycles resulting in approximately 1 per 13 staff per shift (including HMRC Front Office Staff, Border Force staff, Triage Office Staff, PHA Staff, APHA Staff and Site Contractors staff). Shower and changing facilities are provided on-site.

The site is in operation and staffed 24-hours per day. For sustained periods of time there would be a total of 813 staff on-site within a 24-hour period. Staff welfare facilities include toilets, hot water, and food storage and making facilities. Staff at the site will include:

- IBF Site Contractors, comprising:
 - IBF Duty Operations Manager
 - IBF Site Manager
 - IBF Site Office Front Personnel
 - Security Marshals
 - Traffic Management Marshals
 - IBF Inspection Shed staff
 - IBF Team for managing COVID Tests, if required
- BCP Contractor, comprising:
 - BCP Duty Operations Manager
 - BCP Site Office Front Personnel
 - Security Marshals
 - Traffic Management Marshals
 - BCP Inspection Shed Staff
- Border Force staff
- HMRC Front Office Staff
- Triage Office Staff

- PHA Staff
- APHA Staff

In addition to the HGV and staff parking areas, on-site facilities include temporary buildings for site contractors and Border Force staff to process paperwork, as well as a driver welfare centre providing toilets and drinking water. Site facilities for HGV drivers are purposefully minimal in order to dissuade drivers from remaining on-site for an extended period. Staff welfare facilities include toilets and hot water.

3.2.2 Staffing Requirements

The operations detailed above require approximately 813 staff (not allowing for COVID-19 testing staff on site, if required) within a period of 24-hour period, as shown in Table 3.1. The staff numbers presented here were captured through dialogue with stakeholders ahead of the issue of the survey in April 2022. These numbers do not include BEIS staff, a small number of which are expected to attend site when intelligence requires them to do so, or DfT staff who will only attend the site under emergency conditions. COVID-19 Testing by HMG may be conducted on site by staff from the IBF Site Contractor's team if required.

Most staff working on-site work a standard set of shift patterns. For the government agencies, staff work across three shifts, with each shift split into two to reduce the number of vehicle movements on-site at shift changeover times. Shift changeover periods will be timed to avoid the network peak hours which are typically 08:00-09:00 and 17:00-18:00 where practically possible.

It should be noted that the travel survey was conducted whilst the BCP was in its non-operational state therefore the number staff on site, the working hours and the mode of transport was relative to this point in time. Staff within the BCP do not have access to the Zeelo shuttle service, as this had not yet been agreed and included in the MOTO/MOU. The shift pattern for all BCP stakeholders is 0800-1800 (except the BCP site security team who are on a 12-hour shift pattern).

Staff will and have been recruited in line with the **Local Employment Strategy (Appendix L of the Operational Management Plan (OMP))**. The aim of the local employment strategy is a drive to recruit locally to avoid the need for people to travel around the country. Some staff will need to be recruited from outside the local area due to a requirement for specialist skills.

Table 3.1 Staff Requirements per 24-hour Shift

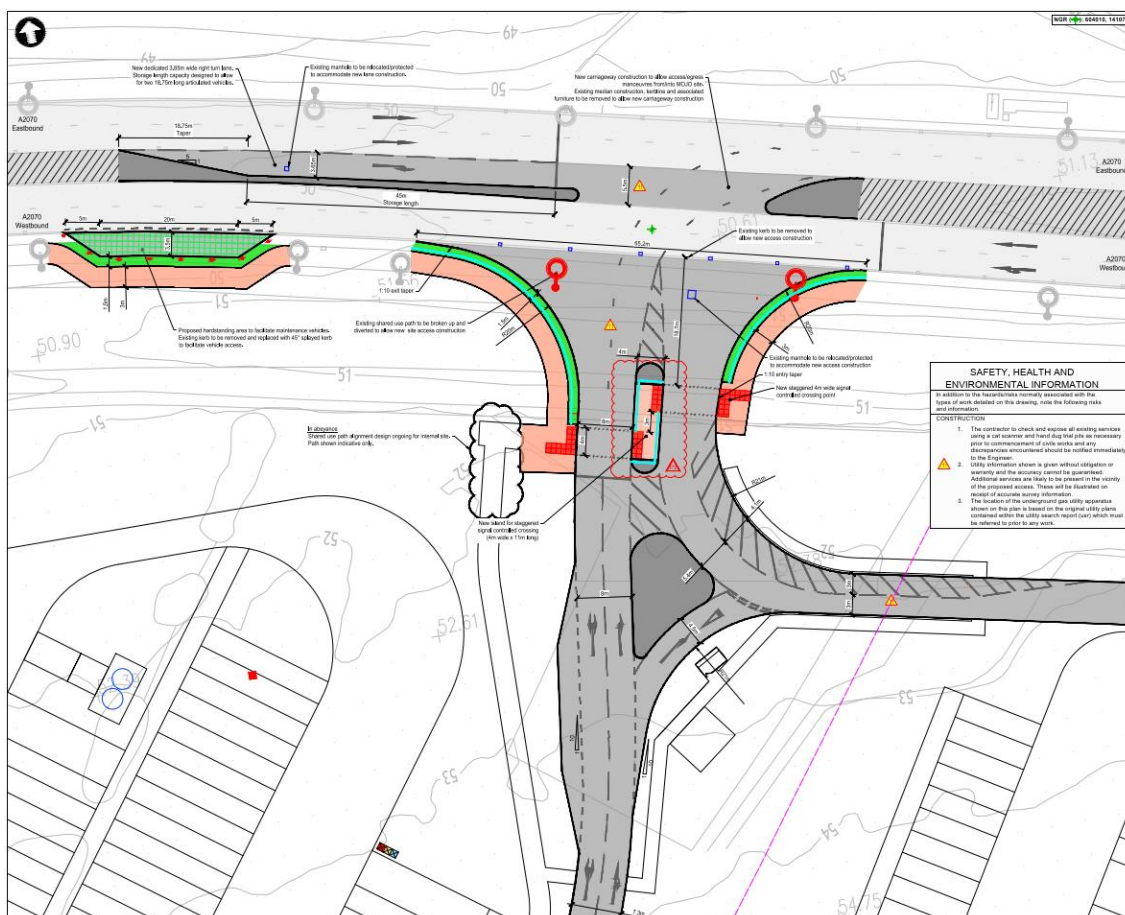

Type of Staff	Staff Required per Shift
HMRC Staff	11
Defra Staff	212
Wincanton	60
Border Force	60
Manpower	60
Brooke Street	100
Sodexo	32
Mitie	268
Wates	10
Total staff	813

NB: This is the maximum number of staff that is expected to be on site over a 24-hour period.

Most HGVs visiting the site approach the Ashford area via the M20 exiting at junction 10a and using the A2070 Link Road to enter the site via the main access junction. Local signage directs HGVs to use junction 10a rather than junction 10 (as described in the **Site Signage Strategy (Appendix H of the OMP)**).

In small numbers, HGVs travelling from other parts of Kent and the south coast take the A259, A28 and A2070 and approach the area via the A2070 Bad Munstereifel Road. HGVs leaving the site turn right out of the main access junction onto the A2070 Link Road and then use M20 junction 10a.

Figure 3.2: Permanent Site Access General Arrangement

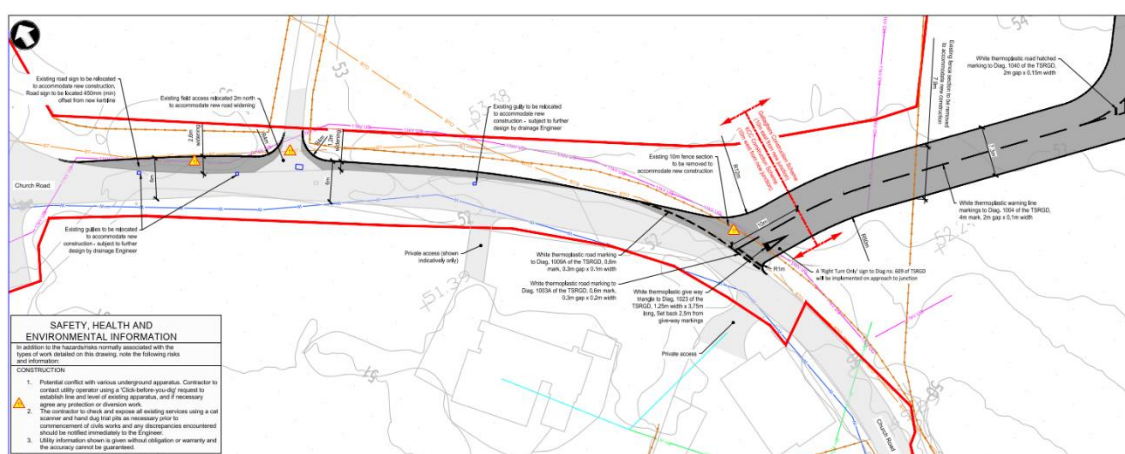

3.4 Staff Access

3.4.1 Staff Vehicular Access

Staff travelling to the site use the A2070 Bad Munstereifel Road turning left or right into Church Road and then access the staff car park off Church Road via a new site access, as depicted in

The use and impact of staff travel on the A2070 Bad Munstereifel Road / Church Road junction will be continually monitored by the Site Operator. Action will be taken should any issues arise due to the volume of staff using the junction, in conjunction and agreement with National Highways and KCC.

Figure 3.3 Church Road Staff Access Junction

3.4.2 Public Transport Access

While it is possible to travel by bus to and from the site, the public transport in the vicinity of the site is limited to one key bus route to the Orbital Business Park, approximately a 12.5 minute walk from Sevington IBF, which provides wider connectivity to Ashford town centre and Ashford International station and three other routes available at the Tesco Superstore on the other side of the M20, approximately a 20 minute walk.

However, the bus routes close to the site have limited frequency – a maximum of every 30-minutes in the Orbital Business Park – and all are limited to daytime hours. Buses are not considered a viable option for all employees due to the timings of shifts. Significant staff travel to the site via public transport is considered unlikely but remains an option for some.

3.4.3 Shuttle Bus Access

A shuttle bus, run by Zeelo, is also available for staff travel. The shuttle service transports staff from two offsite locations: Ashford International Station and Ashford Park and Ride, to Sevington IBF for no fee. The shuttle bus can be booked in advance via an App and the service timetable aligns with shift patterns. The Zeelo shuttle bus offers a good alternative to driving onsite for staff.

3.4.4 Pedestrian and Cycle Access

Pedestrians and cyclists traveling to and from the site use an access point located adjacent to the main access junction located on the A2070 Link Road.

Pedestrian and cycle access to site is provided via a segregated 3m wide shared use path which links to the existing path network running adjacent to the A2070 Link Road. A new guardrail has been installed adjacent to the path at the main site access to provide definition and direct all users to the designated (signal controlled) crossing points. The main pedestrian / cycle link into the site itself is located on the west side of the vehicular access, as shown in Figure 3.2, meaning all users travelling to / from Ashford (i.e. from the west) do not need to cross the path of HGVs which are entering and exiting the site.

The pedestrian access into the Sevington IBF and BCP is provided for staff only. Therefore, no signage is being provided for pedestrians outside the site as there will be no public access. Staff are informed of access points prior to beginning work on the site. Pedestrian and cycle access via the staff car park access on Church Road is restricted as no dedicated, safe route is provided.

4 Policy Review

This section sets out the relevant policy framework for this Staff Travel Plan and the site's compliance with the policy objectives.

Table 4.1 provides an overview of relevant planning policy. The policies included in the National Planning Policy Framework and Local Plan are statutory, but the policies included in the Local Transport Plan are not.

Table 4.1: Overview of Planning Policy

National Planning Policy Framework (NPPF) (2019)
Para 108 - In assessing sites that may be allocated for development in plans, or specific applications for development, it should be ensured that: a) appropriate opportunities to promote sustainable transport modes can be – or have been – taken up, given the type of development and its location; b) safe and suitable access to the site can be achieved for all users; and c) any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be cost effectively mitigated to an acceptable degree.
Para 111 - All developments that will generate significant amounts of movement should be required to provide a travel plan, and the application should be supported by a transport statement or transport assessment so that the likely impacts of the proposal can be assessed.
Kent County Council Local Transport Plan 4 (2016-2031)
This Local Transport Plan (LTP) sets out Kent County Councils (KCC) policies to deliver strategic outcomes for transport and is accompanied by implementation plans and a methodology for prioritising funding. It details KCC's key transport priorities and longer-term transport objectives, ultimately providing a clear, evidenced basis from which to bid for funding and deliver infrastructure to support economic and housing growth 'without gridlock'.
Outcome 1: Economic Growth and Minimised Congestion: Deliver resilient transport infrastructure and schemes that reduce congestion and improve journey time reliability to enable economic growth and appropriate development, meeting demand from a growing population.
Outcome 2: Affordable and accessible door-to-door journeys: Promote affordable, accessible and connected transport to enable access for all to jobs, education, health and other services.
Outcome 3: Safer Travel: Provide a safer road, footway and cycleway network to reduce the likelihood of casualties and encourage other transport providers to improve safety on their networks.
Outcome 5: Better Health and Wellbeing: Provide and promote active travel choices for all members of the community to encourage good health and wellbeing and implement measures to improve local air quality.
Ashford Local Plan 2030
The Local Plan sets out the development proposals for Ashford for the period between 2011 to 2030. The town of Ashford is the main focus for development and regeneration of areas with existing environmental and social issues.
Policy TRA4 - Promoting the Local Bus Network: The potential for bus patronage should be considered as part of any proposal for new residential or commercial development. Applications should demonstrate whether modal shift in favour of public transport can be achieved through existing bus services or improvements to the network as a key determinant of the scheme's sustainability. Enhancements could include the delivery of bus priority measures, the provision of a new service or the alteration/expansion of an existing service, contributions towards bus related infrastructure and operational subsidy for the service in the early years of occupation of the development.

National Planning Policy Framework (NPPF) (2019)

Policy TRA5 - Planning for Pedestrians: Development proposals shall demonstrate how safe and accessible pedestrian access and movement routes will be delivered and how they will connect to the wider movement network. Opportunities should be proactively taken to connect with and enhance Public Rights of Way whenever possible, encouraging journeys on foot.

Policy TRA6 - Provision for Cycling: The Council will seek to improve conditions for cyclists through the following measures... [including] requiring new development to provide cycle parking facilities in agreement with the Council

Policy TRA7 - The Road Network and Development: Developments that would generate significant traffic movements must be well related to the primary and secondary road network. New accesses and intensified use of existing accesses onto the road network will not be permitted if a clear risk of road traffic accidents or significant traffic delays would be likely to result. Proposals which would generate levels and types of traffic movements, including heavy goods vehicle traffic, beyond that which local roads could reasonably accommodate in terms of capacity and road safety will not be permitted. Applicants must demonstrate that traffic movements to and from the development can be accommodated, resolved, or mitigated to avoid severe cumulative residual impacts. In some cases, this may require exploring the delivery of mitigation measures prior to the occupation of a development

Policy TRA8 - Travel Plans, Assessments and Statements: Planning applications will be supported by either a Transport Statement, or a Transport Assessment depending on the nature and scale of the proposal and the level of significant transport movements generated.

Policy TRA9 - Planning for HGV Movement: Proposals which generate significant heavy goods vehicle (HGV) movements will only be supported where the use is acceptable in planning terms, and:-

- a) The size and layout of the site is sufficient to accommodate HGV manoeuvring and parking in a way that does not lead to the public highway being used for either purpose;
- b) HGV movements are limited to appropriate times of operation given the context of the site; and,
- c) Sufficient HGV parking spaces are provided at a level commensurate with use, at not less than the following levels, unless exceptional circumstances dictate a departure from these standards...
 - A3 (Transport Café), 1 space per 5m²
 - B1 Business (high tech/research/light industrial), 1 space per 200m²
 - B2 General Industrial, 1 space per 200m²
 - B8 Storage and Distribution or Wholesale, 1 space per 300m²

5 Baseline Situation

This section seeks to understand the existing availability of a variety of transport modes for site staff as well as current travel patterns in the vicinity of the site.

5.1 Vehicular Access

The key routes on the highway network providing access to the site via the Strategic Road Network (SRN) are the M20 and A2070 Link Road / Bad Munstereifel Road.

The M20 is subject to a National Speed Limit of 70mph and is a motorway with three-lanes in each direction, with two-lane off-slips and a two-lane western section and three-lane eastern section circulatory at the M20 / A20 / A292 / A2070 (junction 10) roundabout. The newly constructed M20 junction 10a slip roads are single lane, with the new M20 / A20 / A2070 roundabout (junction 10a) having a two-lane circulatory carriageway. Both the M20 junctions 10 and 10a are signalised junctions and located approximately 0.3 miles from of the site.

The A2070 Link Road / Bad Munstereifel Road is a 50mph dual carriageway with a restricted speed limit of 40mph which provides connectivity to the south towards the Sussex coast and to the M20 via junctions 10 and 10a, providing wider connectivity in the region from Dover, Folkestone and the Eurotunnel terminal towards London and the rest of the country. The key junctions on the A2070 include:

- The new A2070 Bad Munstereifel Road / A2070 Link Road roundabout (A2070 Bad Munstereifel roundabout) close to the M20 has multiple lane approaches and a two-lane circulatory carriageway.
- The A2070 Bad Munstereifel Road / Barrey Road is a partially signalised junction with a dedicated right turn to Barrey Road but no right turn from Barrey Road to the A2070 Bad Munstereifel Road.
- The A2070 Bad Munstereifel Road / Church Road priority junction which has left and right turns into Church Road and left turn out but no right-turn out of Church Road onto the A2070 Bad Munstereifel Road.
- The A2070 / Waterbrook Avenue / The Boulevard roundabout (A2070 Orbital Park roundabout) which has a two-lane approach with flare on the A2070 (west) and The Boulevard approaches, a two-lane approach on the A2070 (east) approach and a single lane with flare approach on Waterbrook Avenue with a two-lane circulatory carriageway. This roundabout is proposed to be upgraded to a signalised junction.

Access to and egress from the site for Heavy Goods Vehicles (HGVs) is via a new signalised junction on the A2070 Link Road between M20 junction 10a and the A2070 Bad Munstereifel Road roundabout. Access to and egress from the site for staff is via the A2070 Bad Munstereifel Road / Church Road priority junction and a new access junction on Church Road for the proposed staff car park. Staff egressing from the site turn left from Church Road onto the A2070 Bad Munstereifel Road roundabout and then pass through the A2070 Orbital Park roundabout.

Given the suburban nature of the site, the majority of staff are expected to travel to and from the site by private car. Drivers follow signs to the site implemented as part of the **Site Signage Strategy (Appendix H of the Operational Management Plan (OMP))**.

5.2 Sustainable Travel Options

Some site staff are able to travel to the site by a sustainable mode, especially if they live locally. The existing sustainable transport infrastructure in the vicinity of the site, to be encouraged as an alternative to the single occupancy private car, is described in the following text.

5.2.1 Pedestrian Access

Pedestrian access to the site is to be provided adjacent to the main site access junctions via the A2070 Link Road. The A2070 Link Road and A2070 Bad Munstereifel Road are both dual carriageways subject to a 40mph speed limit.

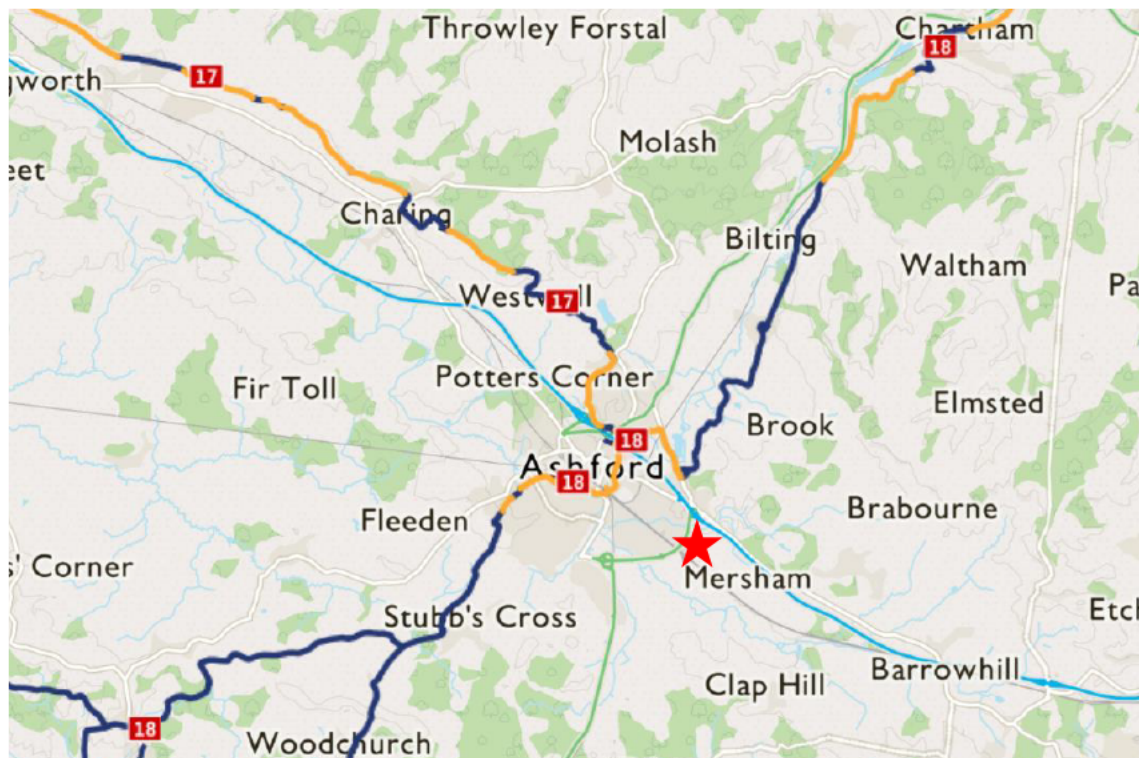

The A2070 Link Road includes segregated footways / cycleways with street lighting in each direction. To the east, the Kingsford Street shared footbridge (built during the junction 10a construction works to replace the Highfield Lane bridge) provides a traffic free route to the A20 to the north of the M20. To the west, there is a newly constructed dedicated footbridge crossing the A2070 to the south of the Bad Munstereifel roundabout (replaced and improved on the previous footbridge in the same location during the junction 10a construction works) providing connections to the Ashford Business Park, Willesborough residential area and Ashford beyond. Footways are also provided on the western side of the A2070 dual carriageway for connections towards the south-west and Orbital Park roundabout.

5.2.2 Cyclist Access

Accessing the site is possible by bicycle via the shared footway / cycleways introduced as part of the M20 junction 10a and A2070 Link Road. Connections to the A20 to the north of the M20 motorway is provided via the Kingsford Street footbridge which has been dedicated for use by non-motorised users. Cyclists are permitted on the newly built shared use footbridge to the south of A2070 Bad Munstereifel Roundabout, providing access to Willesborough and Ashford beyond. The neighbouring town of Ashford has an extensive network of cycleways connecting the Inland Border Facility (IBF) with neighbouring areas.

National Cycle Network (NCN) Route 18 passes through Ashford linking Canterbury to Royal Tunbridge Wells. This is approximately 1.5 miles north of the site, approximately a 7-minute cycle journey. Route 17 joins Route 18 to the north of Ashford and connects with Rochester. The extent of NCN Routes 18 and 17 in the Ashford area is shown in Figure 5.1.

Figure 5.1: National Cycle Network, Routes 17 and 18

Source: [Sustrans](#) NB: Site shown as red star. Orange routes are off-road and blue routes are on-road, accessed 28th June 2022.

5.2.3 Public Transport Access

The public transport in the vicinity of the site is limited to one key bus route which provides wider connectivity to rail services at Ashford International station and three other routes available at the Tesco Superstore on the other side of the M20.

5.2.3.1 Bus Access

The closest bus stop is on Monument Way in the Orbital Business Park to the south-west of the site and on the opposite side of the A2070 Bad Munstereifel Road accessed via the shared foot / cycle bridge over the A2070 south of the A2070 Bad Munstereifel roundabout or via uncontrolled crossings at the A2070 Orbital Park roundabout. It is 0.6 miles / 1 km or approximately 12.5 minutes' walk. Orbital Business Park is served by a single bus route serving Ashford International station, Ashford town centre and residential centres north-west of Ashford as shown in Table 5.1.

Table 5.1: Bus Service* from Orbital Business Park

Service Number	Route	Day	Operation Hours	Frequency
G	Godinton Park - South Willesborough	Weekday	07:00-18:00	1 per hour
		Saturday	09:00-17:30	1 per hour
		Sunday	No Service	No Service

* The frequency has been affected by Covid. Last updated 22nd June 2022. For most up to date frequency, please refer to [stagecoachbus.com](#).

Three bus routes are available at a bus stop on the A20 Hythe Road next to the Tesco Crooksfoot Superstore north of the M20. This is 1 mile / 1.6 km or 20 minutes' walk away from

the site via the existing Highfield Lane bridge. Bus services from this stop are shown in Table 5.2.

Table 5.2: Bus Services* from Tesco Crooksfoot

Route (Operator)	Stops	Day	Operation Hours	Frequency
10/10a (Stagecoach)	Ashford – Folkestone	Weekday	06:00-19:00	1 per hour
		Saturday	06:00-19:00	1 per hour
		Sunday	08:30-18:30	1 per 2 hours
70 (Stagecoach)	Ashford – Folkestone	Weekday	08:00-18:00	1 per hour
		Saturday	08:00-18:00	1 per hour
		Sunday	No Service	No Service
111 (Stagecoach)	Ashford – Folkestone	Weekday	09:30-14:30	2 per day
		Saturday	Thursday Only	Thursday Only
		Sunday	Thursday Only	Thursday Only
125 (Kent Coach Tours)	Ashford – Mersham – Aldington – Bonnington – Ashford	Weekday	07:30-18:00	1 per 2 hours
		Saturday	No Service	No Service
		Sunday	No Service	No Service

* The frequency has been affected by Covid. Last updated 22nd June 2022 For most up to date frequency, please refer to stagecoachbus.com and kentcoachtours.co.uk/bus-services.

5.2.3.2 Rail Access

The nearest station to the site is Ashford International station approximately 2 miles / 3.2 km miles from the site, or a 45-minute walk. Local rail services from Ashford International station are shown in Table 5.3. Ashford International station previously offered direct Eurostar trains to France, Belgium and the Netherlands however these services will not be stopping at Ashford International until the end of 2022 at the earliest.

Table 5.3: Rail Services* from Ashford International Station

Route and Operator	Stations on Route		Operation Hours	Frequency
SouthEastern: St Pancras International – Ashford International	St Pancras International, Stratford International, Ebbsfleet International and Ashford International	Weekday	06:30-23:15	2 per hour
		Saturday	06:30-23:15	2 per hour
		Sunday	08:30-22:45	2 per hour
SouthEastern: London Charing Cross and London Waterloo (East)/London Cannon Street – Ashford International	London Charing Cross, London Waterloo (East)/London Cannon Street, London Bridge, Sevenoaks, Tonbridge, Paddock Wood, Marden, Staplehurst, Headcorn, Pluckley and Ashford International	Weekday	06:30-22:00	2 per hour
		Saturday	07:30-22:00 (First trains departing from Tonbridge from 06:30)	2 per hour
		Sunday	08:30-21:30 (Last trains arrive into Tonbridge, departing Ashford International at 22:32)	1 per hour
		Weekday	06:30-22:30	1 per hour

Route and Operator	Stations on Route		Operation Hours	Frequency
SouthEastern: London Victoria – Ashford International	London Victoria, Bromley South, Maidstone East and Ashford International	Saturday	06:30-22:30	1 per hour
		Sunday	07:30-22:45	1 per hour
SouthEastern: Margate – Ashford International	Margate, Broadstairs, Ramsgate, Canterbury West and Ashford International	Weekday	05:45-00:00	1 per hour
		Saturday	06:00-00:00	1 per hour
		Sunday	08:00-00:00	1 per hour
SouthEastern: Ramsgate – Ashford International	Ramsgate, Minster, Sturry, Canterbury West, Chartham, Chilham, Wye and Ashford International	Weekday	05:00-23:00	1 per hour
		Saturday	06:00-00:00	1 per hour
		Sunday	07:30-23:00 (First trains call at Ramsgate and Canterbury West only departing Ramsgate at 07:00)	1 per hour
SouthEastern: Ramsgate/Sandwich – Ashford International	Ramsgate/Sandwich, Deal, Walmer, Martin Mill, Dover Priory, Folkestone Central, Folkestone West and Ashford International	Weekday	06:00-23:00	1 per hour
		Saturday	06:00-00:00	1 per hour
		Sunday	07:30-23:00	1 per hour
SouthEastern: Dover Priory – Ashford International	Dover Priory, Folkestone Central, Folkestone West, Sandling, Westenhanger and Ashford International	Weekday	04:30-00:00	1 per hour
		Saturday	05:00-00:00	1 per hour
		Sunday	08:00-00:00	1 per hour
Southern: Eastbourne – Ashford International	Eastbourne, Hampden Park, Pevensey & Westham, Cooden Beach, Collington, Bexhill, St Leonards Warrior Sq, Hastings, Ore, Three Oaks, Doleham, Winchelsea, Rye, Appledore, Ham Street and Ashford International	Weekday	05:00-21:30	1 per hour
		Saturday	06:00-22:30 (First train departing from Hastings at 5:20 and last train arrives at Hastings departing Ashford International at 23:25)	1 per hour
		Sunday	08:00-21:30 (First train departing from Hastings at 07:24 and last train arrives at Hastings departing Ashford International at 22:34)	1 per hour

Last updated 22nd June 2022. For most up to date information, please refer southeasternrailway.co.uk and southernrailway.com.

5.2.4 Shuttle Bus Service

A shuttle bus, run by Zeelo, is also available for staff travel to site. The shuttle service transports staff from two offsite locations, Ashford International Station; and Ashford Park and Ride, to Sevington IBF for no fee. The shuttle bus can be booked in advance via an App and the service timetable aligns with shift patterns. The Zeelo shuttle bus offers a good alternative to driving onsite for staff and offers the opportunity for staff to use rail to get to work.

5.3 Issues and Opportunities

In summary, the site is strategically located near the M20, a key HGV route between the Port of Dover, Eurotunnel and the rest of the country on the south-eastern edge of Ashford. Whilst this offers benefits in terms of keeping HGV traffic away from urban areas and local communities it does mean that opportunities to travel to and from the site via public transport, walking and cycling are limited. Whilst it is possible to travel by bus to and from Ashford town centre and Ashford International station via the nearest bus stop, which is 12.5 minutes' walk away, this is located in the Orbital Business Park and is a single half hourly service. Three other services are available at 20 minutes' walk away but on the other side of the M20.

Walking and cycling to and from the site is feasible via shared footway / cycleways introduced along the A2070 Link Road and M20 junction 10a with connections into Willesborough and South Ashford via a shared foot cycle bridge located south of the A2070 Bad Munstereifel roundabout. However, Ashford town centre and Ashford International station are beyond reasonable walking distance for most people.

Table 5.4 shows the key issues and opportunities for the site.

Table 5.4: Key Issues and Opportunities

Issues	Opportunities
There are minimal cycle and pedestrian facilities in the vicinity of the site	Local employees from Finberry, Kingsnorth and South Willesborough could be encouraged to use active travel modes or use of free staff transport provision
The closest station is too far away to encourage rail journeys	There are opportunities to promote car sharing instead of single occupancy car journeys to the site or provide transport between the site and local rail station
There are limited bus services for the site	The existing bus route serves many residential areas and the rail station and could offer multimodal journeys to the site

6 Travel Behaviour

This section aims to look at the existing travel patterns of those that currently work in the vicinity of Sevington and assesses what this means for the Sevington Inland Border Facility (IBF) site. The previous iteration of this Staff Travel Plan used data from the 2011 Census. In May 2022 a Staff Travel Survey was conducted to provide a more accurate picture of travel behaviour. This section summarises the findings from the Staff Travel Survey.

6.1 Staff Travel Survey

To understand current staff travel behaviour and to support travel and access to Sevington Inland Border Facility (IBF) site, a staff travel survey was conducted between 20th May 2022 and 9th June 2022.

The survey was sent to 827 staff members by key stakeholder contacts for each company involved by email. A QR code was also printed and posted in rest areas and on noticeboards. Key stakeholder contacts for each company involved also sent out a reminder to complete the survey halfway through the survey period. There were a total of 492 responses to the survey, giving a 60% response rate.

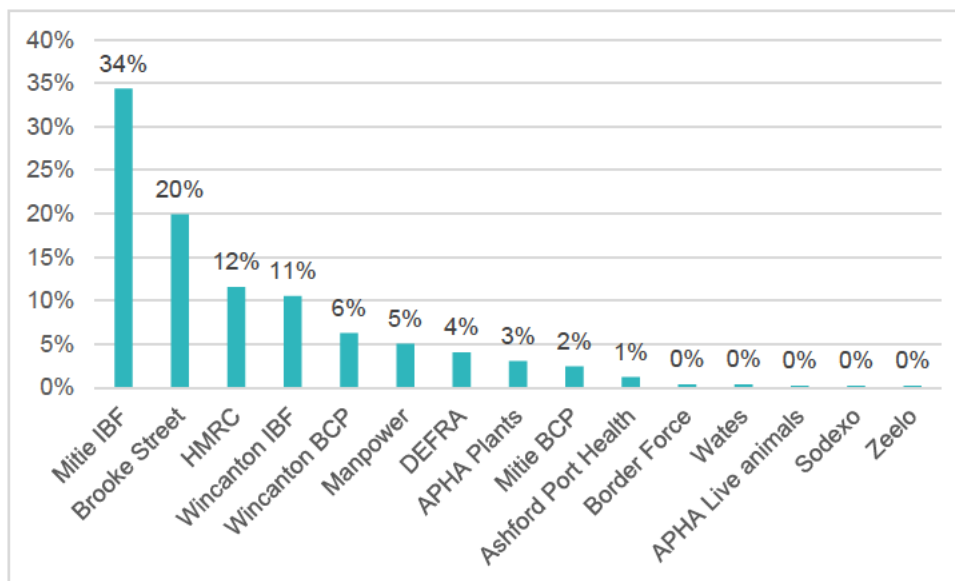

The survey asked staff a range of questions about their travel to Sevington IBF site and their propensity to travel by other more sustainable means. The survey also asked respondents about their working patterns and facilities to encourage them to stay on site during breaks. This section provides a summary of the survey responses.

Please note that not all graphs and tables will sum to 100% due to rounding.

6.1.1 Work Demographics

With such a large number of organisations working on site, the staff survey asked which company they worked for. The results are shown in Figure 6.1. The most common response was Mitie IBF with just over a third of respondents (34%). This was followed by Brooke Street (20%), HMRC (12%) and Wincanton IBF (11%). There were very low responses, with under five individuals responding, from each of the following; Sodexo, Border Force, Zeelo and Wates.

Figure 6.1: Companies Respondents Work for (n=492)

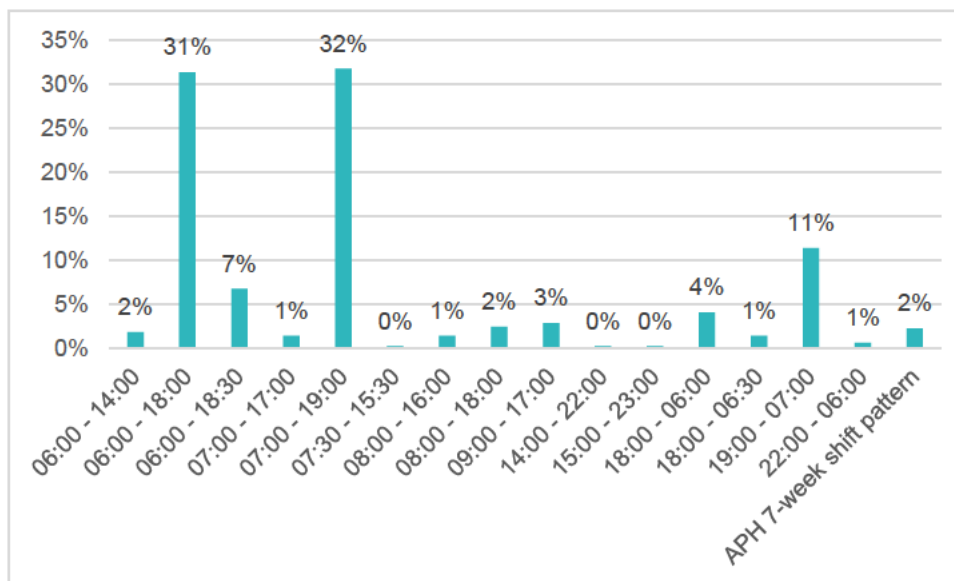

Staff were also asked about which staff group they belong to within their companies. A breakdown of this is presented in Table 6.1.

Table 6.1: Table Showing the Staff Group of Respondents (n=346)

	HMRC		Wincanton IBF		Wincanton BCP		Mitie IBF		Mitie BCP		Manpower	
	No.	%	No.	%	No.	%	No.	%	No.	%	No.	%
Administrati on			5	10%								
Estates	1	2%										
FLT Drivers					8	26%						
FM									6	50%		
Front Office					5	16%					12	48%
Health and Safety			14	27%	1	3%						
Inspection	2	4%	14	27%	4	13%					13	52%
Management / Peoples			12	23%	13	42%						
Operation	54	95%										
Pollution			7	13%								
Security							94	56%	6	50%		
Traffic Marshals							75	44%				
Total	57		52		31		169		12		25	

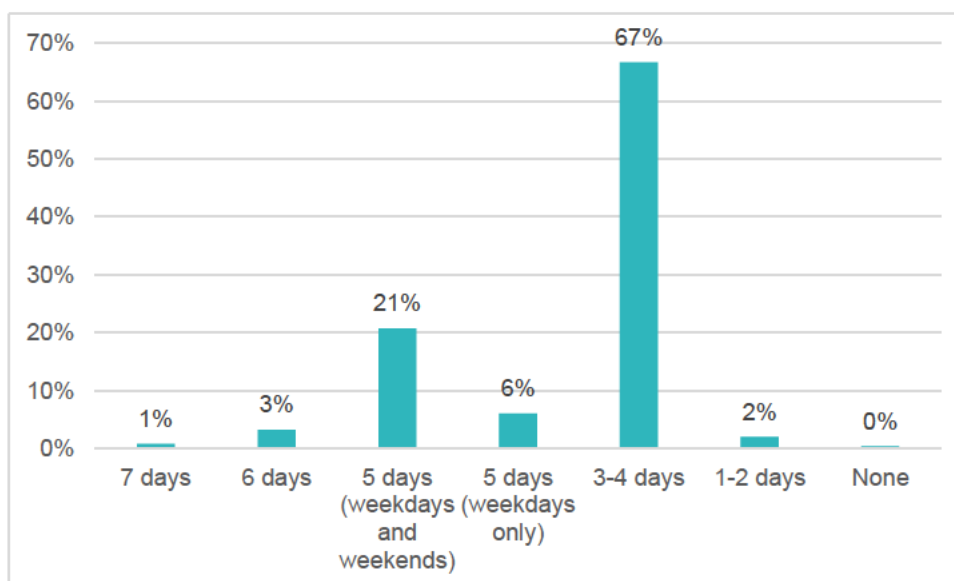

Respondents were also asked about their usual shift patterns as shown in Figure 6.2. The most common answers were 07:00 – 19:00 (32%) and 06:00 – 18:00 (31%). It must be noted that Mitie have a rolling shift pattern of 07:00 – 19:00 and 19:00 – 07:00 and so the 32% and 11% that have indicated those shift patterns may be interchangeable.

Figure 6.2: Respondent's Shift Patterns (n=492)

This was followed by a question asking how often staff travel to site in a typical week (Figure 6.3). The majority of staff, 67% (328 respondents) travel to site for 3-4 days each week. The second most common answer was 5 days a week (weekdays and weekends) which 21% of respondents selected (102 respondents).

Figure 6.3: Number of Days Staff Travel to Site (n=492)

Respondents were also asked if they travel off site during breaks. 369 respondents (75%) answered no, and 123 respondents (25%) answered yes. For the 123 respondents (25%) that answered yes, this was followed by a question asking what facilities would encourage them to stay on site through breaks where they could select multiple answers.

102 of these respondents (83%) said more food choices on site would encourage them, 73 of these respondents (59%) said better rest spaces and 68 of the respondents (55%) said better kitchen facilities. Additional comments were left by 28 respondents (23%) which included

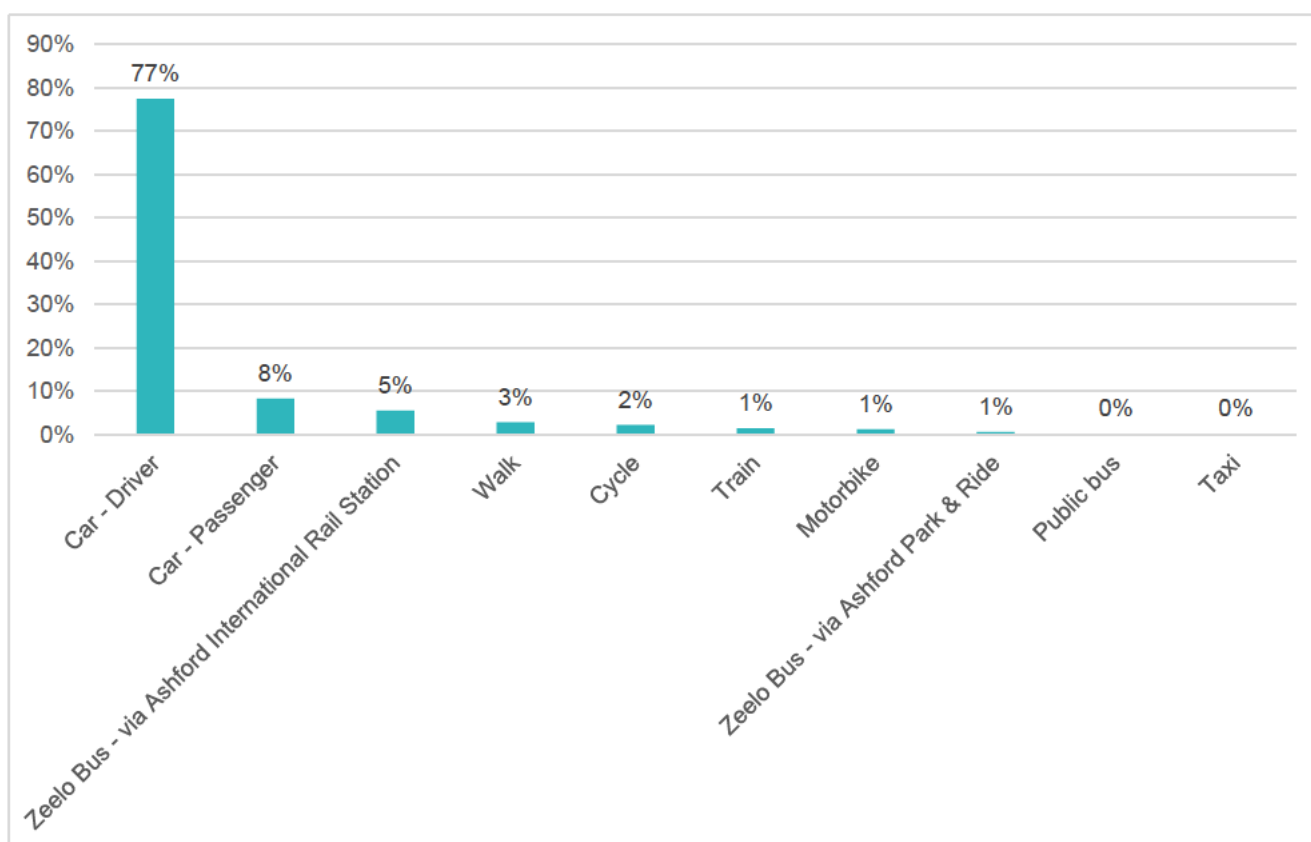

suggestions about spaces to improve wellbeing, more outdoor space and subsidised canteen food. All comments can be found in Appendix A.1.

6.1.2 Modal Split of Travel to work

To understand the modal split of staff, respondents were asked several questions about their travel to work.

Staff were asked how they usually travel to work and to select the mode that is the longest part of their journey (Figure 6.4). The majority of staff, 77% (381 respondents), usually drive to Sevington IBF Site in a car, with the second most common answer being travelling to site in a car as a passenger, selected by 8% of respondents (41 respondents).

Figure 6.4: How Staff Usually Travel to Sevington IBF Site (mode that is the longest part of their journey) (n=495)

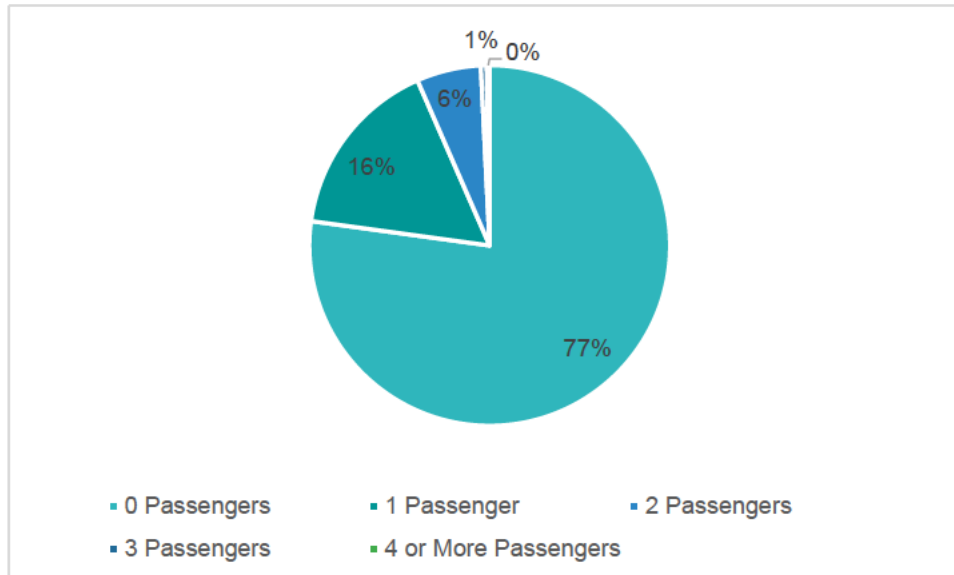

6.1.2.1 Car as main mode of travel

A total of 422 survey respondents (85%) use a car to get to work, either as a single occupancy journey or as a passenger. This subsection uses the data collected from the survey to establish how many journeys are single occupancy or car share journeys.

Of those who answered 'Car Drivers' a subsequent question was asked about the number of passengers that travelled with them on their journey to work. The results are shown in Figure 6.5. The majority (77%) of car drivers (294 respondents, 60% of total respondents) travel alone, with no passengers. The 'Car Drivers' who do carry passengers combined with the 'Car Passengers' make up the 26% of staff who car share. The second most common answer was

travelling with one passenger with a 16% response rate (62 respondents). The remaining 25 drivers carry more than one passenger on a regular basis.

Figure 6.5: Number of Passengers Travelling with Car Drivers (n=381)

Therefore, 60% of staff travel by single occupancy car to the site and 26% car share. These car share figures are based on survey respondents who identified as Driver (with passenger/s) or Passenger, we have excluded from these figures the number of passengers a Driver states they travel with, to reduce the risk of double counting those who responded as 'Passenger'.

6.1.2.2 Summary of Modal Split

Table 6.2 shows a summary of modal split based on the results of the Staff Travel Survey. It is noted that the single occupancy car modal share, at 60%, is lower than the national average and car sharing is already well established amongst staff.

Table 6.2 Modal Split summary table

Mode		Mode Split % (actual number)
Car – Driver single occupancy		60% (294)
Car Share	Total	26% (128)
	As Driver	18% (87)
	As Passenger	8% (41)
Zeelo Bus – via Ashford International Rail Station		5% (27)
Walk		3% (14)
Cycle		2% (11)
Train		1% (7)
Motorbike		1% (6)
Zeelo Bus – via Ashford Park & Ride		1% (3)
Public Bus		0% (1)
Taxi		0% (1)

6.1.2.3 Train as main mode of travel

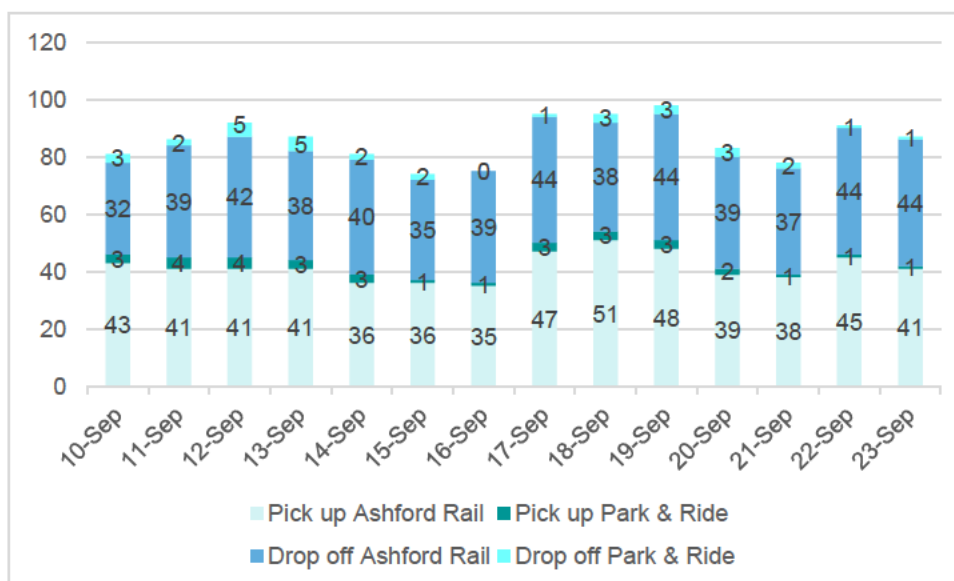

Staff that selected the train as their usual mode of travel were asked to specify their home station. Canterbury West was the home station for 43% of train users (3 respondents). Folkestone Central was the home station for 29% of train users (2 respondents). Derby was the home station for 14% of train users and Dover Priory was also the home station for 14% of train users (1 respondent each). This acknowledges the longer distances that staff travel to the site, which may cause travel issues and potential reluctance to change mode.

6.1.2.4 Zeelo Bus (Ashford Rail and Park & Ride shuttle)

Staff that selected: car driver, car passenger, motorbike, public bus, taxi or train were also asked if they were aware of the free Zeelo Bus Service from Ashford Park and Ride and Ashford International Rail Station. 86% (375 respondents) of these respondents were aware of it and 14% were not aware of it (62 respondents). This was followed up with a question asking would these respondents consider using the Zeelo Bus to get to work, where 15% of respondents (64 respondents) answered yes and 85% (371 respondents) answered no. Of the 14% (62 respondents) of users who were not aware of the Zeelo Bus Service from Ashford Park and Ride and Ashford International Rail Station, 21% (13 respondents) would consider using it.

Passenger data provided by Zeelo for two weeks in September 2021 indicate that a small proportion, around 5%, of the current site population use the service to travel to and from Ashford Rail station. Less than 1% use it to travel to and from the Market Place Park and Ride site. Passenger data provided by Zeelo is provided in Figure 6.6.

Figure 6.6: Zeelo Bus Usage by Site Staff

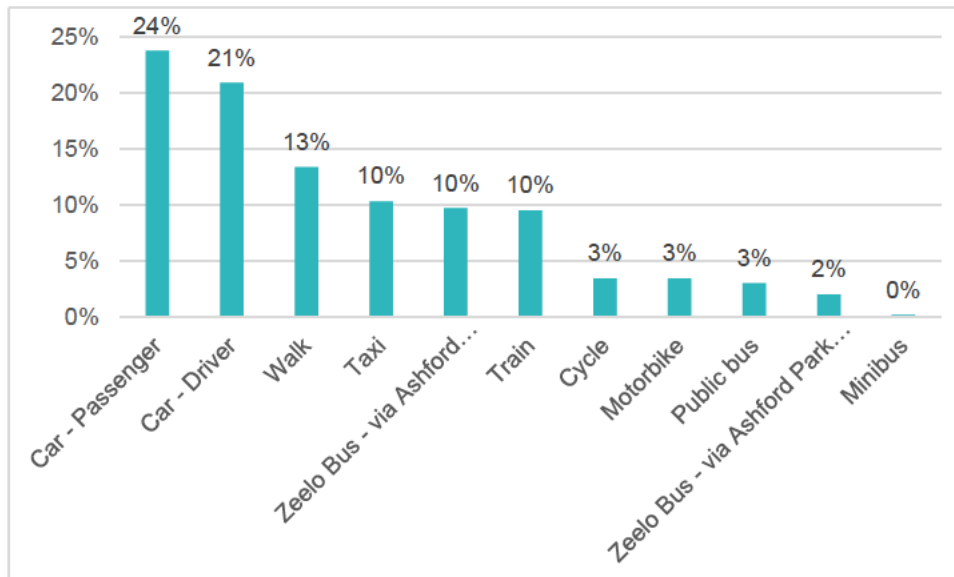

6.1.3 Alternatives to usual mode of transport

All staff were also asked if their usual mode of travel was not available, how they would travel to work and they were asked to select the mode that would take the longest (Figure 6.7). The most common mode of travel stated was car passenger with almost a quarter of respondents providing this answer, 24% (117 respondents). This shows that there is a potential to increase car sharing to the site. This was closely followed by car driver with 23% of respondents selecting this option (103 respondents). 10% of respondents indicated they would catch a taxi, use the Zeelo Bus- via Ashford International Rail Station and use the train respectively.

Unsurprisingly public bus options were not very popular as an alternative, likely due to the distance of the closest bus stops to the site.

Figure 6.7: Alternative Mode of Travel to Sevington IBF Site (n=492)

6.1.4 Encouraging Sustainable Travel

Staff were asked about what would encourage them to take alternative more sustainable modes of transport.

Respondents that did not indicate that their usual mode of travel was walking or cycling, were asked what would encourage them to walk or cycle for some or all of their journeys to work (Table 6.3). Respondents were allowed to select multiple answers.

Over half of these respondents (54%) said nothing would encourage them to walk or cycle. 15% said safer route infrastructure would encourage them, 13% said help with purchase of a bicycle would encourage them and 12% said better shower and changing facilities would encourage them. 20% of respondents selected 'other'. Respondents also explained that they lived too far from site and the lack of public transport and active travel provision made it challenging to travel sustainably. All comments can be seen in Appendix A.2.

Table 6.3: Encouraging Walking and Cycling (n=467)

	Number	%
Nothing would encourage me	250	54%
Other	95	20%
Safer route infrastructure (wider pathways, segregation from traffic, etc)	69	15%
Help with purchase of a bicycle	60	13%
Shower and changing facilities	56	12%
Benefits / rewards for walking or cycling to work	51	11%
Better connections on public transport services	48	10%
Secure cycle parking	31	7%
Maintenance facilities on site	28	6%
Better facilities at train stations and/or on trains	15	3%

	Number	%
More information on the benefits of walking and cycling	14	3%
Cycle buddy scheme	10	2%

Single occupant car drivers, motorbike and taxi users were also asked what would encourage them to car share (Table 6.4). Respondents were able to select more than one answer. 40% of these respondents said nothing would encourage them to car share. On the other hand, 34% said help in finding car share partners with similar work / travel patterns would encourage them. 10% of respondents selected 'other' which included challenges surrounding Covid and a requirement to travel to different sites creating difficulties for car sharing. Others have mentioned concerns about being let down and how their location makes car sharing challenging. All additional comments can be found in Appendix A.3.

Table 6.4: Encouraging Car Sharing (n=301)

	Number	%
Nothing would encourage me	119	40%
Help in finding car share partners with similar work / travel patterns	102	34%
Free taxi home in an emergency	42	14%
Promotion of staff incentives	42	14%
More information on the benefits of car sharing	35	12%
Preferred parking	31	10%
Other	29	10%
Pool or lease cars on site	27	9%

6.1.5 Postcode Data

439 respondents provided the first 4 digits of their home postcodes in the survey. Postcodes have been used to establish where staff live in relation to their mode of travel to the site. From this information, four maps have been created to show the distribution of staff home locations and their modes of travel.

Figure 6.8 shows all postcodes received plotted on the map of the UK. As can be seen the largest cluster of postcodes is close to the site with 250 respondents (51%) living within the highlighted box. Although it is acknowledged that staff at Sevington IBF have very dispersed postcode locations, it is likely that those living more locally have more opportunities to change their mode of travel to work.

Figure 6.8 Full Post Code Data of Survey Respondents

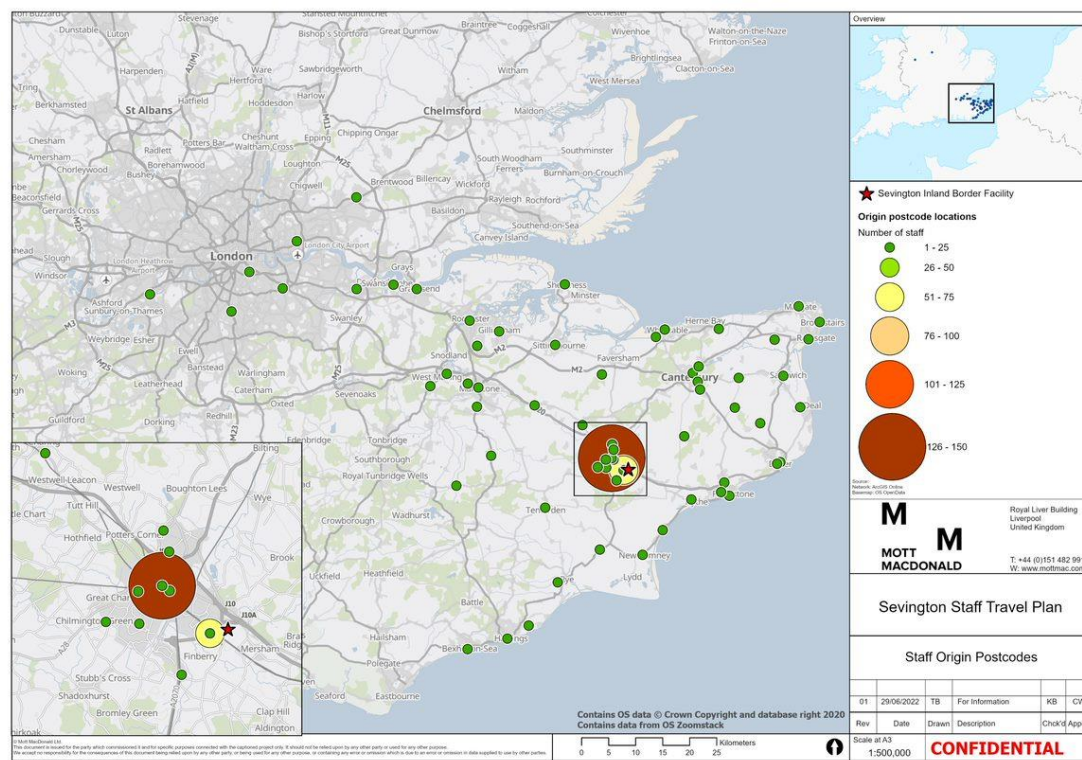

Figure 6.9, overleaf, shows the highlighted section in Figure 6.8 in more detail. This map shows the actual distance from Sevington IBF. The postcode data shows that 228 respondents (46.3%) live within 5km of the site, of which, 76 respondents (15.4%) live within 2.5km.

Figure 6.10 shows how those who live within 5km from the site currently travel. There is a clear majority that travel by car, either as a driver or a passenger despite living close to the site. Very few respondents that live less than 5km from the site travel actively, take public transport or utilise the Zeelo bus to get to work. It is possible that, with the correct measures in place, these respondents would shift their mode of travel to a more sustainable mode. From the survey results, staff at Sevington IBF would potentially be open to car sharing above all other modes of travel. The staff residing less than 5km from site have more flexibility to move away from driving alone, with the Zeelo bus being close to their origin postcode, and also the ability to travel actively (walk or cycle).

Figure 6.9 Staff Postcode Data - Local

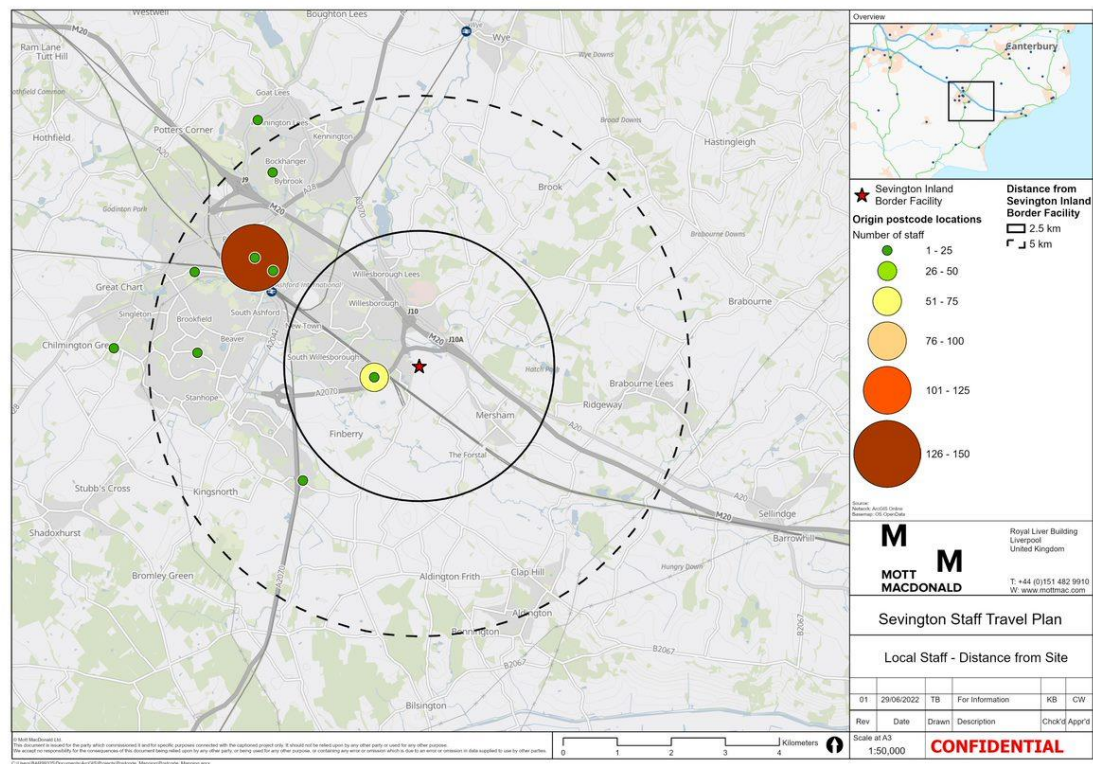

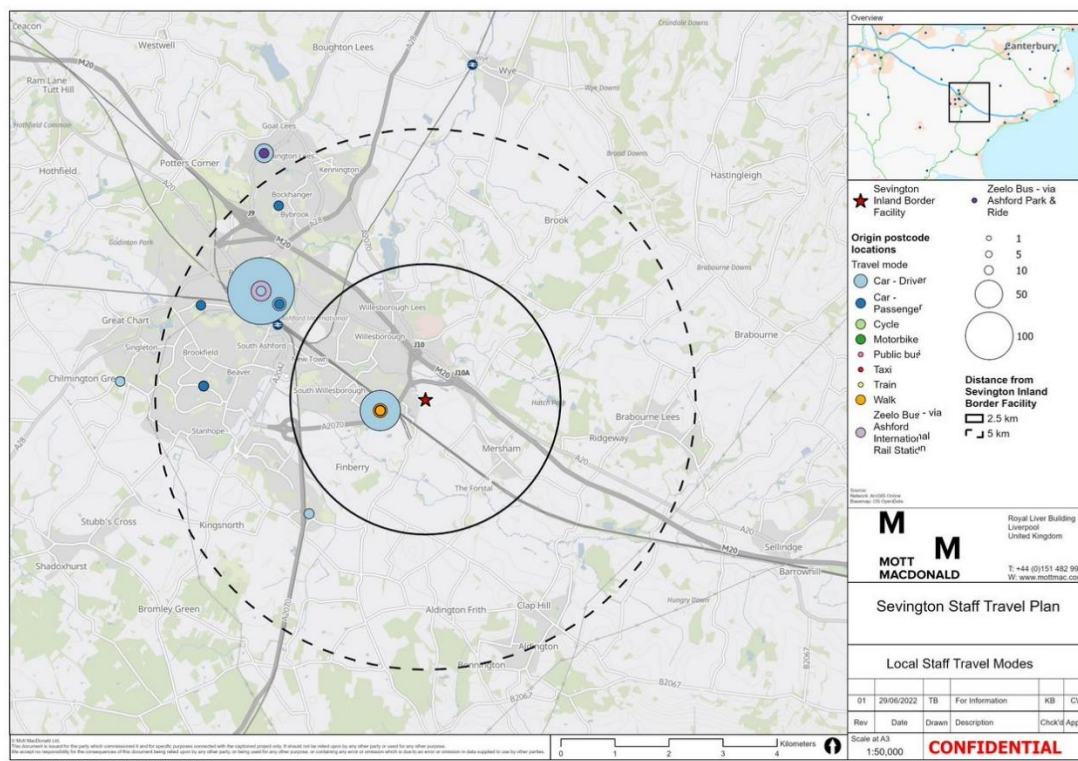

Figure 6.10 shows the mode of travel used by staff that live closest to the Sevington IBF site. This shows the potential to encourage these staff to use more sustainable modes of travel.

Figure 6.10 Mode of travel by Postcode District of Local Staff

A complete map illustrating all postcodes across the UK is included as Appendix B.

6.1.6 Summary

The location of the site, the road network, and the public transport network available make car use the predominant travel mode amongst staff. Car sharing is already well established amongst staff and postcode data indicates that it could be further increased to reduce single occupancy car use. There are also opportunities to make some modest shifts to active travel and public transport amongst staff that live within 5km of the site.

7 Travel Plan Objectives and Targets

This section outlines the objectives of the Staff Travel Plan (STP).

7.1 What are Travel Plan Objectives and Targets?

The objectives, measures and targets in this Travel Plan are based on the findings from the Staff Travel Survey and the baseline assessment of the local area, including the policy context.

A STP must have targets and objectives that are quantifiable and measurable over time, as a means of assessing whether the initiatives implemented to influence travel behaviour amongst staff have been successful. They must be ambitious enough to provide the Site Operator with the incentive to encourage changes in travel patterns yet be realistic and achievable.

Mode split targets are set out below for achievement within the life of the Travel Plan. Objectives are aspirational, less specific and focus on the overriding principles behind the targets.

7.2 Travel Plan Objectives

This STP document provides a framework for the longer-term management of travel to and from the site.

The principal objectives for this STP are set out in the following text. Regular monitoring must be undertaken to assess the success of the initiatives / measures that have been implemented and to review progress against identified targets.

The objectives of this Travel Plan are to:

- Maximise the use of sustainable modes of travel by staff on their journey to and from the site, including public transport, walking, and cycling
- Minimise the number of car trips made to and from the site – particular focus will be placed on reducing single occupancy car trips
- Contribute to and facilitate improvements in health of staff through the promotion of active travel
- Deliver an on-going commitment to sustainable transport issues at the site, with comprehensive monitoring that leads to a regular review of targets and measures

7.3 Travel Plan Targets

With these objectives in mind, the following mode split targets (see Table 7.1) have been set. The initiatives that are identified in **Section 8** will help to increase the use of sustainable travel modes.

The Travel Plan targets have been split into the following time bands, to reflect the lifespan of the site:

- Short term = up to 6 months
- Medium term = 6 months to 2 years
- Long term = 2 to 5 years

Table 7.1 Modal Share Targets

Target	Current Modal Split *	Short Term Target	Medium Term Target	Long Term Target	Objectives Supported	How will progress be measured?
Reduce single occupancy car usage	60%	56%	52%	48%	- Minimise the number of car trips made to and from the site - Contribute positively to the local environment	Travel survey
Increase car sharing	26%	29%	32%	35%	- Minimise the number of car trips made to and from the site - Contribute positively to the local environment	- Travel survey - Car sharing platform
Increase travel by public transport	7%	7.5%	8%	8.5%	- Maximise the use of sustainable modes by staff - Deliver an on-going commitment to sustainable transport issues	- Travel survey - Use of free staff transport
Increase travel via walking and cycling	3%	3.5%	4%	4.5%	- Contribute positively to the local environment - Contribute to and facilitate improvements in health of staff - maximise the use of sustainable modes by staff - Deliver an on-going commitment to sustainable transport issues	- Travel survey - Cycle stand counts

*Does not equal 100% due to motorcycle and other modes not being included

8 Travel Plan Measures

This section includes the core recommendations and travel planning measures for Sevington Inland Border Facility (IBF) and Border Control Post (BCP). These measures include actions to be taken forward by a number of different individuals and groups.

8.1 Travel Plan Coordinator

To implement the Staff Travel Plan (STP), a Travel Plan Coordinator (TPC) as a part time role will be assigned. The TPC is responsible for progressing the measures and being a contact point with regards to sustainable transport.

8.2 Free Staff Transport (Zeelo bus)

Her Majesty's Revenue and Customs (HMRC), the Site Operator, have implemented free transport for staff between the Sevington IBF, the Park and Ride site and Ashford Rail Station for each shift change. This travel measure provides a good viable alternative to private car use for staff.

Designated pick up and drop off points have been identified based on current employee information. The service can be accessed via an app so that the number of vehicles and pick-up / drop off points can be tailored to reflect demand from the app and as more employee information becomes available.

8.3 Staff Travel Plan Measures

Table 8.1 summarises the measures proposed for the STP and notes the responsibilities, timescales, cost, relative priorities, and primary beneficiaries of each measure.

The Travel Plan measures have been split into the following time bands, to reflect the lifespan of the site:

- Short term = 0 to 6 months
- Medium term = 6 months to 2 years
- Long term = 2 years to 4.5 months

The cost column categorises each measure into low, medium, or high cost which broadly represent the following cost bands:

- Low cost = <£5,000
- Medium cost = £5,000-20,000
- High cost = >£20,000

These measures are based upon the findings of the site audit, findings of the staff travel survey and policy aspirations for the area.

Table 8.1: Staff Travel Plan Measures

Theme	Measure	Timescale	Methodology	Cost	Issues / Objective Addressed / Reason	Success Criteria
Communications	Assign a Travel Plan Coordinator (TPC) (part time)	Short	Identify TPC for the implementation of proposed measures	Low	Providing a point of contact for Her Majesty's Revenue and Customs (HMRC) / Ashford Borough Council to ensure the Travel Plan is implemented	TPC actively coordinates and implements initiatives
Communications	Staff to be briefed on the sustainable travel options available	Short	Promote the STP and benefits available	Low	Promotes sustainable travel opportunities for staff	Information provided at site in buildings
Communications	Provide staff with information on travelling safely within COVID-19 restrictions, if required	Short	Promote safe travel within current restrictions	Low	Allows those staff who can travel sustainably to do so	Information provided at site in buildings
Administration	Undertake annual monitoring	Medium / Long	Undertake repeat Travel Surveys. Monitor use of cycle parking, car parking and take up of sustainable travel schemes	Low	To monitor the success of the travel plan	Travel surveys are conducted periodically to assess if targets are being met
Administration	Submit annual progress update and update STP	Medium / Long	Use monitoring data to update travel plan targets and action plan to reflect progress made	Low	To ensure a living travel plan document that is regularly monitored and updated	Targets are being met
Car	Set up a car share scheme to help staff find suitable partners	Short	Introduce a car share scheme and encourage staff to sign up	Medium	- To reduce single occupancy vehicle use 102 respondents said they would car share if they had help finding a suitable car share partner.	Increase in number of car sharers

Official Sensitive

Theme	Measure	Timescale	Methodology	Cost	Issues / Objective Addressed / Reason	Success Criteria
Car	Guaranteed ride home for car sharers	Short / Medium / Long	Introduce a formal guaranteed ride home for staff car sharers to alleviate concerns about being stranded at work in the event of unforeseen circumstances	Low	- Support car sharing - Supports sustainable travel when working late shifts	Increase in number of car sharers
Car	Consider introduction of car sharing bays	Medium / Long	Consider introduction of marked car sharing bays	Low	- To reduce car parking demand - To encourage car sharing	- Increase number of car sharers - Car sharing spaces are well utilised
Car	Pre-booking system for car parking	Short / Medium / Long	Introduce a formal booking system for car parking spaces to minimise unnecessary vehicle trips to the site to alleviate concerns about overspill of parking	Low / Medium	- Reduce single occupancy car use - To reduce car parking demand - To encourage car sharing	- Mitigate car parking overspill - Increase in number of car sharers
Car	Electric vehicle charging points	Short / Medium / Long	Promote electric vehicle charging points to staff	Medium	Promotes the use of more sustainable vehicles	Increases sustainability
Public transport	Promotion of the free staff shuttle bus to Ashford Station	Short/ Medium / Long	Publicise and promote use of the staff shuttle	High	- Reducing single occupancy car use - Supports sustainable modes	Public transport mode share is being met
Public transport	Encourage the use of public transport by site staff	Short / Medium / Long	Use platforms to encourage staff to use public transport where possible, state that parking is constrained and limited	Low	- Increase travel by public transport - Reduce single occupancy car use	Public transport mode share target is being met
Cycle	Introduce cycle to work scheme for staff	Short / Medium	Encourage HR to introduce cycle to work scheme	Low (dependent on uptake)	Supports a choice of travel options to sites, reducing car parking pressure	Increase travel via walking and cycling

Official Sensitive						
Theme	Measure	Timescale	Methodology	Cost	Issues / Objective Addressed / Reason	Success Criteria
Cycle	Cycle parking / Showers / Changing facilities	Short		Medium	- Needs to be linked with promotion of cycle parking facilities - To support cycling to the site	Good cycle facilities that encourage staff to travel by active modes
		Medium / Long		Medium / High		Cycle parking provision reviewed on a regular basis, if demand appears high, plan for additional parking to be provided
Cycle	Provide cycle / cycle maintenance training session	Short	Staff signposted to cycling activities provided by local council thus allowing them to continue travelling by this mode e.g. Dr Bike	Low / Medium	To support cycling to the site and active travel	Increase travel via walking and cycling
Pedestrian	Improved pedestrian access	Short / Medium	Consider opportunities to improve pedestrian access	High	Supports active travel to work	Increase in walking trips
Promotion	Promote journey planning smart phone applications	Short / Medium	Promote smart phone applications to staff	Low	- Supports sustainable modes - Provides latest travel information	Increase travel by sustainable modes
Promotion	Provide route planning sessions	Short / Medium	Staff provided with an opportunity to plan routes suited to their needs	Low	- Support sustainable modes - Provides travel information	Increase travel via walking and cycling / public transport
Promotion	Promote sustainable travel benefits	Short / Medium / Long	Continue to promote on internal platforms the benefits of travelling sustainably	Low	- Supports sustainable modes - Provides travel information	Increase in sustainable modes

Theme	Measure	Timescale	Methodology	Cost	Issues / Objective Addressed / Reason	Success Criteria
Promotion	Promote Zeelo Shuttle Bus service	Short	Promotional communications to all staff	Low	14% of survey respondents said they were unaware of the shuttle service. 15% of survey respondents said they would consider using the service.	Increase in Zeelo bus patronage.
Awareness	Hold annual events to promote national events e.g. Bike Week	Medium / Long	Establish events that are well promoted	Low	- Supports sustainable modes - Provides travel information	Increase travel via walking and cycling and public transport

9 Management and Monitoring

This section sets out the management and monitoring process for the full Staff Travel Plan (STP). A STP requires a continuous process for improvement, including monitoring, review, and revision to ensure it remains relevant to the site and those occupying and using it. This section sets out the key responsibilities in terms of management and monitoring.

9.1 Travel Plan Management and Responsibilities

Effective, on-going management is vital in assessing the success (or failures) of the Travel Plan. The Travel Plan Coordinator (TPC) is responsible for carrying out travel surveys, developing the document and managing the implementation of the proposed measures in this STP.

9.2 Travel Plan Monitoring

Typically, it is recommended a period of five years be allowed for the Travel Plan to become firmly established and for benefits, both economic and sustainable, to become fully measurable. However, the lifespan of this site is 4.5 years, therefore it is proposed that the progress of the STP towards achieving mode-share targets will be monitored on an annual basis.

It is recommended an initial full travel survey is undertaken around nil to three months (with nil being the day this Operational Management Plan (OMP) comes into effect) into the site's operation, with a further full survey in years two and four. Smaller snapshot travel surveys will be undertaken at the end of years one and three. This will allow measures and initiatives to be continually altered to reflect levels of success and ensure that targets are realistic and achievable. In this way, the STP will be continually evolving.

Table 9.1: Monitoring Schedule

Travel Plan Year	Year	Survey
Year 0	First year of operational site	Full Travel Survey
Year 1	Opening year +1	Snapshot Travel Survey
Year 2	Opening Year +2	Full Travel Survey and Travel Plan Review
Year 3	Opening year +3	Snapshot Travel Survey
Year 4	Opening year +4	Full Travel Survey and Travel Plan Review

STP progress is being continually monitored through the review of progress against measures identified for implementation. Future staff travel surveys will give an indication of progress made towards the travel plan measures and steps required for full realisation of the plan and will allow corrective actions to be undertaken should any part of the plan be poorly adhered to or lacking in impact. Measures will be reviewed on an annual basis and amended as required.

In addition to travel surveys, monitoring will also be undertaken in the form of reviewing usage of car parking, the shuttle bus service, cycling parking, and the take up of policies and promotions e.g. cycle to work scheme.

9.3 Travel Plan Marketing

To ensure the STP is as far reaching as possible, marketing is proposed as part of the packages. The Travel Plan marketing will be included at key information points throughout the

site. The purpose of the marketing will be to provide staff with site travel information that allows them to make informed travel choices. The focus of the marketing will be predominately information on sustainable transport options and how to use them.

The following actions to inform staff and the local community of the STP will be undertaken utilising existing lines of communication:

- Promote and co-ordinate site specific events such as 'Bike Week'
- Advertise Travel Plan activities and events via universally accessible forums including payslips, and posters located around each building e.g. promoting cycle to work scheme
- Regular e-newsletters sent directly to staff
- Produce a 'Welcome information' pack for staff
- Provide route planning sessions.

10 Summary

This Staff Travel Plan (STP) has been prepared for the Sevington Inland Border Facility (IBF) site for a temporary Heavy Goods Vehicle (HGV) customs and border control checking and parking facility. This STP document provides a framework for the longer-term management of travel to and from the site.

This STP provides a strategy for managing travel demand in a dynamic process of implementation, monitoring and review. It is a package of practical measures with the aim of improving access by all modes of travel and improving choices for everyone. The underlying aim of this STP is to maintain and increase sustainable mode share, while minimising the number of car trips generated by encouraging travel via sustainable modes.

The local employment strategy aims to recruit staff locally where possible to reduce the need to travel around the country. Some staff will need to be recruited from outside the local area due to a requirement for specialist skills. Reviews have been undertaken and access issues and sustainable travel opportunities identified. There are opportunities for the encouragement of staff to choose sustainable modes, in particular car sharing or the use of the free staff shuttle bus.

A package of measures with suggested timescales and costs have been identified for implementation and promotion. STP objectives and targets have been set for achievement during the life of the site with a proposed system for administration, marketing and monitoring of the STP.

Additional analysis of the outputs of the Staff Travel Survey should be considered to provide an updated, future edition of the STP. Analysis included in this edition is limited due to the short timeframe set to deliver the STP.

Appendices

A. Further Comments

The text from the three questions which allowed additional comments are contained in this Appendix. It should be noted that the comments have been included exactly as they were written by staff.

A.1 What facilities would encourage you to stay on site through breaks?

What facilities would encourage you to stay on site through breaks?

Use of the green corridor as a wellbeing space.

This survey is of limited use, there is a BUSINESS need to leave and return to site throughout the working day to carry out off site inspections.

Nothing. This survey is of limited use there is a business need to leave and return to site through the day to carry out off site inspections.

This survey is limited use. There is a business need to leave and return to site throughout my shift to carry out off site inspections.

Pay me my lunch hour

The food vehicle on site is pointless its never open

Better variety of food

FOOD MACHINES, COFFEE VENDINGS.

more evenly spread chairs in all kitchens

Need small Caffee Shoop or More food choices on site. some Restaurant

A restaurant on site

Subsidised canteen

Better lounge , FOOD OPTIONS, cafeteria, resting space as on night shift a quick 20 min power nap can help you feel refreshed.

I would much like a canteen or some vandy machines as travelling off site for breaks is not always possible

It is nice to leave site and get a change of scenery as it breaks the night up, as well as assists the environment by not adding to traffic queues when purchasing fuel when most people are asleep. Also I then can go and check on my horse.

All of the above

I think there needs to be a complete overhaul regarding staff welfare on site. There is no relaxing spaces where one can just unwind and take their mind off of work during their break. There is always other stakeholders walking through and talking business and it feels less like a break and more-so just an hour away from our desk.

Healthy food available and an opportunity to have space to both exercise and relax

Outdoor space to have a walk or wander

Current kitchen is a bit miserable

Picnic area in the green space where the trees have been planted.

ANY OPTIONS WOUKLD BE GOOD

summer somewhere outside to sit and eat as I am a non smoker

What facilities would encourage you to stay on site through breaks?

we usually go back home to look after the kids during the break time and look out for any issues.

I have other responsibilities that make me leave site as well

Hot food options, vending machines

There is nothing of interest on site, therefore I leave site. There are no outside spaces with seating, this is an urgent requirement. There are no food choices on site

Paid Break

A.2 What would encourage you to cycle or walk some or all of your journey to work?

What would encourage you to cycle or walk some or all of your journey to work?

I use a pool car to arrive on site from my work location

I am required to have a car for travelling to other sites for plant health work.

I live 230 miles away from site so this isn't possible

Pedestrian access at Sierra 1 would save me 15 minutes per journey.

Not an option due to distance from my home address

To far to cycle to work as I live in Dover

Drive a long way

I live in Dover but if I was closer I would cycle or walk to work

I live 25 miles from site

37 Mile one way journey

Given the distance I travel (28 miles each way) cycle or legs are not an option trains do not run early for me to get into work on time

30 MILES EACH WAY TO WALK, CYCLE?

Too Far

I require a car for my work as I often have to leave and travel to other sites across Kent throughout the day

Rather too far

Live to far away

N/A

DISTANCE TOO FAR, POOR PUBLIC TRANSPORT CONNECTIONS, WAS NECESSARY TO GET CAR TO COMMUTE TO WORK IN TIME

Place to fix my bike as I can't afford to get it fixed

I live in a small village that is to far to cycle with no public transport options

To far to cycle on the roads if not I would cycle

I would travel via pushbike or walk if train prices wasn't so expensive and trains run at better time as it's either you get to work hours early or hours late

I need to leave and pick up my children from school

What would encourage you to cycle or walk some or all of your journey to work?

live over 25 miles from site
More stops on the Zeelo as would take me over 30 minutes to there closest bus stop
Living in Ashford, near a closer site.
registered disabled
I have a blue disability badge
I live to far away
NONE I LIVE 30 MILES AWAY
Summer is ok but winter is horrible for cycling
Travel To far to cycle
I would consider walking the last bit to the site if the parking was nearby and has electric charging points available.
It takes 1 hour in the car each way so wouldn't want to walk it or even cycle to work would take way to long. Have some sort of life.
I walk from Ashford International Station to Sevington
In the morning and in the afternoon, I am going straight to drop off or pick up my kids from schools. Unfortunately, I can't use the bus, to do this. Many thanks for understanding.
I live 26 miles away
Travel fees for workers who live out of the area
It to far to walk or cycle
Any other way would take over 2 hours to get to work and cost more money
Use My own car
There arnt many option that could help with regards to getting to work. There several options that could work such as an incentive for car share options with a petrol bonus for staff. For local staff member cycle to work incentive are great but find that you have to be with a company for a year for that to be used . From what I heard from ppl who wished to use that service. In general regards to the zeelo service I understand the service has got some good reviews but are let down by the traffic in the general area a further late services for the zeelo maybe a good placement for ppl who miss the service (beware I do not have much knowledge in this area) site facilities on site could be improved in general aspects and access a onsite tuck or sandwich shop. An encouragement to be on site access and a look into the site facilities eg toilets and aspect for some staff member being in there later years or have personal health conditions that could leave staff breaking all the site rules to avoid a site wide humiliation.. I speak plain.
I live 20 miles from work. I'm not cycling that twice a day.
I live to far away to cycle
I live about miles away from site
I live 44 miles away from work place..
To far
live to far away to walk or cycle 13 miles
I can only come to work in my car, I can't use any other means of transport. Why not think about making more parking spaces, there is enough space, and a parking restriction can lead to job loss. I have many colleagues who can't use bicycles for health reasons, they also can't use the bus because they are not close to the bus route. It would be better to contribute a little to our fuel cost instead of suggesting that we come by bike to have it on foot, it

What would encourage you to cycle or walk some or all of your journey to work?

would be a waste of time, another problem would be the weather conditions. I don't know why so many unfavorable decisions are being made for workers lately.

Live too far

I stay too far to travel via cycle to work.

I live too far to cycle to work.

I require to travel on the motorway (M20) so cycle or walking i not an option.

It would but from where I live is difficult

I already walk some of the journey to work.

Too far to work or cycle

Live too far away

I have a complex journey and none would benefit me.

Distance to work is to far to walk or cycle

I never learned how to ride a bike because my dad said i was too clumsy and bought me a barbie scooter instead.

I travel from CT11 once a week, car essential

We had to leave much earlier in order to catch the Zeelo and when completing a 12 hr shift, every extra time can impact the amount of hours awake when rest is paramount.

It is absolutely impossible to cycle or walk to work as my journey is over 30 miles each way.

Living closer to my place of work

Live to far away to take public transport

I live 25 miles away with no public transport facilities

Live too far away. Otherwise I would be interested if nearer and safe route available

nice weather

The distance is too far approx. 28 miles

I live 40 miles away, it takes an hour minimum to drive. I cannot get publix transport in a timely manner or cycle there.

I cycle to work some days within the week but it does depend on my working week

I do an 80 mile round trip each shift, where I also pick up 4 or more colleagues. There is no better alternative.

Assistance with paying for petrol

I live over 20 miles away so cycling is not an option

Too far to walk or ride to work and trains do not start early enough to get too work

I LIVE TO FAR AWAY TO CYCLE

NOT ABLE TO FOR HEALTH REASONS

Cheaper travel by Train/bus

Not Possible due to the nature of the job (i.e. have to go out daily to different sites at various time for inspections), so the car is necessary.

Not all entrances will allow you to walk through

What would encourage you to cycle or walk some or all of your journey to work?

I ALREADY WALK AND TAKE THE ZEELO

Cheap bus or trains

Its already a 50-60 min drive away

I would love to travel via Zeelo if there was a pickup location closer to us or alternative means but as we have 2 children, we get extra flexibility while travelling by car as we can leave home a bit late than usual and arrive home on time to look after the children. Current Zeelo travel option is either half way to work and don't have an alternative to reach there or towards the opposite direction from our home which will take us longer to reach from home and as well as return back to home. Our major concern is us being dependent on others to look after our children while we are at work, so travelling by car gives us a better option.

COST OF PUBLIC TRANSPORT

Require a car to leave site for work purposes.

Live in rural location roads dangerous narrow width

Distance too far. I don't wish to walk before and after a 12 hour shift.

After a long day or night. I just want to get home.

Depends on Weather

Work requires travel to and from the facility for inspections

It's too far to cycle to work

I cycle to work as well as drive

Not possible due to my remote home location

A.3 What would encourage you to car share?

What would encourage you to car share?

I already car share

I live remotely and therefore access to public transport is difficult. I would need to get two trains before arriving in Ashford. This would triple my travel time.

I live 230 miles away from site so this isn't possible

Never travel with passengers and do not have the option to collect people

I have the ability to car share with another work colleague who is on the same shift 06-00 to 1800
But he is on a different pattern we are prepared to share travel costs and reduce our carbon footprint also to reduce the amount of cars in the limited spaces available

Already car share

I already have a friend that works on the same shift as me that I could share with but he may be on a different shift pattern, ie working different days.

not appropriate after Covid

Aiming to car share with 3 people if shifts can be matched

Difficult, as I could move between sites throughout the day

Putting us on the same shifts

Already car share on occasional

What would encourage you to car share?

I don't have a car
I already collect people to bring to work
Already do
My only transportation is my motorbike
And the passengers to help cover fuel cost
i already car share now
This is a problem as i do not work set times and days so trying to car Share is a problem.
Fuel allowance
Ride a motorcycle
Not applicable in my role - single individual per 12 hr shift
I need to drop off and pick up my kids from school, before or after my work. I am aware of bus schedules, but doesn't help me.
A petrol incentive for each member of staff you bringing to work earn you a bonus. Money talks and staff would offer overs. A drop off incentive if staff don't use the parking option then encourage them to possibly be dropped off at a different access location
I do car share now
Don't know anyone from my area
having a car park closer to where i work
No one lives near me so this is impossible
I did this and was let down. It causes trouble whether driving or getting a lift
I already have done in the past and those people have now left.
Sharing petrol cost
Train discount(tickets)
i like my freedom ... i dont want to wait for any one or make anyone wait for me..and i travel on different times as required by my personal needs.
if people liked me :(
I did car share in past. The issue is when you have to leave in emergency, the other person is stuck with
I have car shared before and it does not work for various reasons.
Already do this
I already do this.
I share travel on on some occasions
I bring 2 others to work
Already Carshare
already car sharing
No one on my shift lives in Faversham where I live

What would encourage you to car share?

Due to the nature of the job, not possible to share the car as mainly there will be 1 inspector that needs to travel at 1 destination.

Limited time between shifts so wouldnt share

As mentioned earlier, we have to make sure everything is okay with the children's before leaving for work and have to be at home as soon as possible, due to this car sharing would be a bit difficult option for us.

already do

Require a car to leave site for work purposes

I already car share and bring people in

Location near my house or same route

Work requires travel to and fro from the facility through out the day

Not possible due to my remote home location

Don't have a car

B. Full Postcode Map
